Federal Budget FY2018-19 - Implications for the Economy and Capital Markets

PML-N government recently announced its sixth and the last budget. As expected, the budget was somewhat populist and ambitious as it tried to offer relief to all the sectors of the economy and the broader society. The budget envisages boost to economic growth by placing emphasis on development projects, expanding agriculture sector output, stimulating industrial sector by lowering tax burden and sustaining robust consumption by offering tax relief to individuals. What remains laudable about the budget is that the government is making it difficult for the non-filers by placing restriction on acquisition of immovable assets and automobiles and thereby forcing them to come into the tax net. Similarly, provision has been made to reduce the steep gap between the real estate's market rates and the DC rates, which is an important and bold step in addressing the perennial issue of documenting the economy.

FY18 marked the continued improvement in economic growth as GDP growth is expected to clock in at 5.8%, the highest pace of growth in the last 13 years. The impressive growth is achieved on account of strong performance of agriculture, industry, and services sectors, which grew by 3.8%, 5.8% and 6.4%, respectively supported by low interest rates and benign inflation. The tailwind to the robust growth is provided by improved energy supplies, unprecedented ongoing investment activity under China-Pakistan Economic Corridor, strong credit growth, and buoyed investor & consumer confidence. However, due to the exchange rate adjustment during the year, the per capita income remained nearly flat at USD1,641.

The economic growth has picked up in the last couple of years, however the imbalances have re-emerged on both the internal front and especially, on the external side. As per the provisional budget estimates, the government is targeting fiscal deficit at 5.5% during FY18, which will likely be revised upwards in our view due to lower than projected provincial surplus and other fiscal slippages. The current account deficit stands at USD12 billion during 9MFY18 and the government is expecting it to reach USD15 billion for the full year 2018. In response to the declining SBP foreign exchange reserves, the government enacted various policy measures such as an exports rebate package, controlled PKR devaluation, and hike in import duties. The above policy actions have started yielding some initial results as March 2018 exports showed a healthy 12% growth on a YoY basis. Inflows from the recently promulgated amnesty scheme remain critical in providing much needed relief on the external front given lumpy external debt repayments and a still large current account deficit. Nonetheless, we feel that Pakistan will enter into a fresh IMF program in FY2019, which will be critical in reducing its external account concerns. Inflation is expected to rise near 6% in the next fiscal year due to gradual rise in food and commodity prices (notably oil), incessant government's fiscal financing, and measured currency devaluation. Rise in inflation is also expected to result in increase in interest rates next year. Tightening of monetary, trade and fiscal policies in FY19 is expected to slow down the economic growth rate.

For the stock market and listed corporate sector, the budget is mainly positive. Though, contrary to expectations, two key proposals, removal of inter-corporate dividends taxation and rationalization of Capital Gain Tax were not enacted in the budget, other steps were favorable for the stock market and mutual fund industry such as: (i) abolition of 5% tax on issuance of bonus shares (for both corporates and mutual funds); (ii) gradual reduction in corporate tax rate (barring banking sector) from 30% to 25% by FY2023; (iii) phasing out of super tax from currently applicable rate of 3% on non-banks and 4% on banks in three years time; (iv) lowering of mandatory payout ratio from 40% to 20%, reduction of incremental tax on non-compliance from 7% to 5%; and (v) enhancement of investment limit for tax credit on shares and mutual funds from PKR1.5 million to PKR2 million.

For sectors, the budget is a mixed bag. It is positive for the Textile sector as the government has pledged to clear the refunds over the next 12-months, and reassured to clear new refunds on a monthly basis. The budget also mentions a new export package (for value added and non conventional markets) details of which will be given later. Fertilizer sector is also a beneficiary of the budgetary measures as the government rationalized sales tax rate on fertilizers to 2%, reduced sales tax from 10% to 5% on supply of feedstock gas, and raised the agri credit target to PKR1.1 trillion. The budget is marginally positive or a non-event for the Banking, Oil and Gas Marketing, Power Generation & Distribution, and Flat Rolled Steel sectors. It is negative for a few sectors such as Auto Assemblers as non-filers are now barred from buying new automobiles; Cement as FED has been raised from PKR62.5 per bag to PKR75 per bag; and Long Rolled Steel producers as sales tax on electricity has been raised by PKR2.5 per kWh to PKR15 per kWh.

Stock Market Review

In anticipation of favorable tax measures for the capital market in the recently announced federal budget FY2018-19, the stock market started the month on a positive note with the benchmark KMI 30 Index advancing to a recent high of 79,313 on April 10, 2018, translating into an increase of 3.0%. However, the momentum lost steam and the market surrendered nearly all the gains of the first week, to finish the month at flattish level. The promulgation of tax amnesty scheme for declaration of foreign and domestic assets with the objective to address the external account woes and documentation of the economy was welcomed by the market participants. Investors' optimism around the favorable taxation measures for the capital market in the federal budget reached a fervent point at the beginning of the month. However, the ongoing corporate result season with mixed earnings reports failed to provide any trigger to the market. Despite some of late improvements post the recent devaluation of the currency and other regulatory measures on the non-essential imports, financing of the ballooning external deficit remained investors' main wall of worry. The market is pinning hopes on the tax amnesty scheme to fetch some amount to help manage the external account imbalance to some extent. We believe that the announcement of schedule of upcoming national elections and the caretaker set-up will ease political uncertainty surrounding the continuation of democratic process in the country. During the month, Foreign Investors, Banks/DFIs, Companies, and Insurance Companies were net sellers, whereas Mutual Funds and Individuals remained net buyers in the market.

During the month, Automobile Assemblers, Chemicals, Fertilizer, Glass & Ceramics, Oil & Gas Marketing, and Pharmaceuticals sectors performed better than the market while, Cement, Commercial Banks, Engineering, Paper & Board, and Textile Composite sectors lagged behind. Healthy earnings announcements in the ongoing corporate results season led to the out-performance of the Automobile Assemblers sector. Chemical sector outshone the market on account of improving profit margins and better earnings announcements. Investors accumulated position in the Fertilizer sector in anticipation of favorable budgetary measures in the federal budget FY19. Robust earnings announcement resulted in out-performance of the Glass & Ceramics sector. Better performance of the OMC sector is attributable to above expected earnings announcement by the select companies and expectation of positive developments on resolution of circular debt issue. Despite healthy volumetric growth, subdued profitability driven by shrinking profit margins resulted in lagged performance of the Cement sector. Drag on earnings from one-off provisioning of pension liabilities, SBP's decision to keep policy rate unchanged in its last review, and tightening regulatory requirements resulted in the subdued performance of the Banking sector. The Textile Composite sector under-performed the market on account of dismal performance of a select stock amid disappointing earnings announcement. In spite of better than forecasted earnings announcement, expectation of unfavorable policy measures in the budget led to lagged performance of the Engineering sector.

Going forward, market may remain choppy amid rising noise in the domestic politics ahead of national elections and developments on the Pak-US relations. That being said, we hold sanguine view on the stock market given: (i) attractive valuations as captured in Price-to-Earnings multiples of 10.3; (ii) Low inflation & still benign interest rates; (iii) plentiful market liquidity; (iv) paltry yield on the alternative investment avenues; and (v) expectation of resumption of foreign portfolio inflows in due course of time.

Money Market Review

After recording 3.2% YoY in March 2018, inflation as measured by the CPI for April 2018 increased to 3.7%. The monthly CPI reading came in above expectation and is the highest MoM rise in 53 months. Reiterating our view, we expect inflation to further pick-up from these levels amid second round impact of the recent PKR depreciation, partial pass-through of the recent increase in the global oil prices, and reversal of base effect. During the month, sovereign yields came off slightly as against the market expectation of 25-50 bps increase, the central bank kept the policy rate unchanged in its bi-monthly monetary policy review at the end of March 2018. Foreseeing upside risks to inflation and interest rates, investors' preference remained tilted towards the short tenor government securities. Through Open Market Operation (OMO), the State Bank of Pakistan managed the weighted average overnight repo rate at 6.02%. SBP's foreign exchange reserves remained under pressure, declining by USD685 million to USD10.9 billion as per the last reported number on 20th April.

During the outgoing month, SBP held two T-Bill auctions with a combined target of Rs. 1,900 billion against the maturity of Rs. 2,299 billion. In the first T-Bill auction, an amount of Rs. 1,897 billion was accepted at a cut-off yield of 6.24% for 3 months tenor and 6.35% for 6 months tenor, however no bids were received in 12 months tenor. In the second T-Bill auction an amount of Rs. 1,477 billion was accepted at a yield of 6.26% for 3 months tenor and at a 6.35% yield for 6 months tenor. Again no bids were received for 12 months tenor. Besides, in the PIB auction, bids worth Rs. 88 billion for 3 years, 5 years and 10 years tenor were received against the target of Rs. 100 billion and maturity of Rs. 31 billion wherein an amount of Rs. 35 billion was accepted at a cut-off yield of 7.20%, 8.03% and 8.50%, respectively, while, no bid was received in 20 years tenor. The bid pattern remained skewed towards 10 years tenor.

We have calibrated the portfolio of our money market and income funds based on our interest rate outlook and remain alert to any developments that may influence our investment strategy.

Investment Objective

To provide preservation of capital and earn a reasonable rate of return along with a high degree of liquidity by investing in short-term Shariah Compliant banks and money market / debt securities.

Fund Manager Commentary

The Fund generated an annualized return of 5.6% for the month of April 2018 versus the Benchmark return of 2.3% thus registering an outperformance of 3.3% p.a. This reported return is net of management fee and all other expenses.

The Fund aims to consistently provide better return than the profit rates offered by Islamic Banks / Islamic windows of commercial banks, while also providing easy liquidity along with a high quality credit profile. The Fund is allowed to invest in short-term Shariah Compliant money market securities of up to six months maturity rated AA- or better. The Fund is not authorized to invest in corporate debt securities and Equities.

The allocation of the Fund in GOP Ijarah Sukuks is around 2.9% of net assets. Around 92% of net assets of the portfolio are invested in bank deposits which enhance the liquidity profile of the Fund. The weighted average time to maturity of the Fund is 9 days.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

To provide competitive return with maximum possible capital preservation by investing in low risk and liquid Shariah Compliant authorized instruments.

Fund Manager Commentary

The Fund generated an annualized return of 4.6% for the month of April 2018 versus the Benchmark return of 2.6% thus registering an outperformance of 2.0% p.a. This reported return is net of management fee and all other expenses.

The Fund aims to consistently provide better return than the profit rates offered by Islamic Banks / Islamic windows of commercial banks. Minimum eligible rating is AA, while the Fund is not allowed to invest in any security exceeding six months maturity. The weighted average time to maturity of the Fund cannot exceed 90 days while also providing easy liquidity along with a high quality credit profile.

The allocation of the Fund in bank deposits is around 99% of net assets which enhances the liquidity profile of the Fund. The weighted average time to maturity of the Fund is 1 day.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

The objective of the Fund is to provide investors an opportunity to earn attractive return from an actively managed portfolio of Shari'ah Compliant Equity Fund and Income Fund.

Fund Manager's Commentary

NBP Funds launched its NAFA Islamic Active Allocation Plan-I (NIAAP-I) in January, 2016 which is the first plan under NAFA Islamic Active Allocation Fund-I. The Active Allocation Plan is dynamically managed between dedicated equity related and income schemes managed by NBP Funds based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-I has an initial maturity of two years.

Since inception, NIAAP-I has generated a return of 10.6% p.a versus benchmark return of 11.8% p.a. The current exposure in Equity Fund and Income Fund stands at 59.2% & 32.0%, respectively. The Plan can invest up to 100% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

Investment Objective

The objective of the Fund is to provide investors an opportunity to earn attractive return from an actively managed portfolio of Shari'ah Compliant Equity Fund and Income Fund.

Fund Manager's Commentary

NBP Funds launched its NAFA Islamic Active Allocation Plan-V (NIAAP-V) in January, 2017 which is the fifth plan under NAFA Islamic Active Allocation Fund-I. The Active Allocation Plan is dynamically managed between dedicated equity related and income schemes managed by NBP Funds based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-V has an initial maturity of two years.

Since inception unit price of NIAAP-V has decreased by 5.3% p.a versus the benchmark decline of 4.3% p.a. The current exposure in Equity Fund and Income Fund stands at 59.5% & 33.8%, respectively. The Plan can invest up to 100% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

Fund Manager's Commentary

NBP Funds launched its NAFA Islamic Active Allocation Plan-VI (NIAAP-VI) in May, 2017 which is the first plan under NAFA Islamic Active Allocation Fund-II. The Active Allocation Plan will be dynamically managed between dedicated equity related and income schemes managed by NBP Funds based on the Fund Manager's outlook of the authorized asset-classes. The plan is presently closed for new subscription. NIAAP-VI has an initial maturity of two years.

Since inception, unit price of NIAAP-VI has decreased by 9.5% versus the benchmark decline of 6.9%. The current exposure in Equity Fund and Income Fund stands at 58.7% & 34.7%, respectively. The Plan can invest up to 100% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

Fund Manager's Commentary

NBP Funds launched its NAFA Islamic Active Allocation Plan-VII (NIAAP-VII) in June, 2017 which is the second plan under NAFA Islamic Active Allocation Fund-II. The Active Allocation Plan will be dynamically managed between dedicated equity related and income schemes managed by NBP Funds based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-VII has an initial maturity of two years.

Since inception, unit price of NIAAP-VII has decreased by 2.9% versus the benchmark increase of 0.8%. The current exposure in Equity Fund and Income Fund stands at 57.3% & 35.7%, respectively. The Plan can invest up to 100% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

Investment Objective

The objective of NAFA Islamic Capital Preservation Plan-I is to earn a potentially high return through dynamic asset allocation between Shariah Compliant Dedicated Equity and Money Market based Collective Investment Schemes and /or Shariah Compliant savings accounts / Shariah Compliant term deposits, while providing Capital Preservation of the Initial Investment Value including sales load at completion of twenty four months and beyond.

Fund Manager's Commentary

NBP Funds launched its NAFA Islamic Capital Preservation Plan-I (NICPP-I) in February, 2018 which is the fourth plan under NAFA Islamic Active Allocation Fund-II. The Plan is dynamically allocated between the Equity Component and Money Market Component by using the Constant Proportion Portfolio Insurance (CPPI) Methodology. Allocation to Equity Component is generally increased where equity market is rising, while allocation to the Money Market Component is generally increased when the equity market declines. The Plan is presently closed for new subscription. NICPP-I has an initial maturity of two years.

Since inception, unit price of NICPP-I has increased by 0.8% inline with the benchmark. The current exposure in Money Market Fund and Equity Fund stands at 77.8% & 18.2%, respectively. During the month, maximum multiplier stood at 3.8 whereas minimum multiplier was 2.4.

Investment Objective

To earn a reasonable rate of return along with a high degree of liquidity by investing in short-term Shari'ah Compliant bank deposits and money market/debt securities.

Fund Manager Commentary

During the month, the Fund has generated an annualized return of 4.6% against the benchmark return of 2.3%. The performance is net of management fee and all other expenses.

The Fund aims to consistently generate better return than the profit rates offered by Islamic Banks / Islamic windows of commercial banks, while also providing easy liquidity along with a high quality credit profile. The Fund is allowed to invest in Shariah Compliant Government Securities of maturity up to 3 years as well as Shariah Compliant money market and debt securities of up to 2 years maturity rated AA- or better.

Around 91% of net assets of the portfolio are allocated in bank deposits. The higher allocation in bank deposits is due to better yields as compared to other authorized alternative investment avenues. The weighted average time-to-maturity of the Fund is 48 days.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

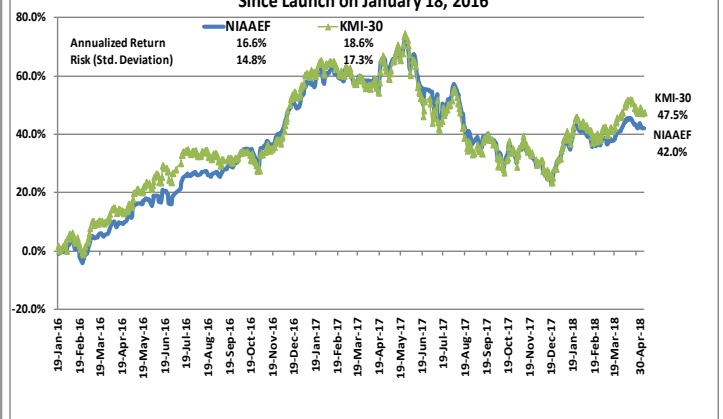

The objective of the Fund is to provide investors with long term capital growth from an actively managed portfolio of Shari'ah Compliant listed equities.

Fund Manager's Commentary

NBP Funds launched its second open-end Islamic Equity Fund namely NAFA Islamic Active Allocation Equity Fund (NIAAEF) in January, 2016. The aim of the Fund is to provide growth to the investment of Unit holders over the long-term in approved Shariah Compliant equities.

NIAAEF started off the month with an allocation of around 85% in equities, which increased to around 90% towards the end of the month. NIAAEF underperformed the Benchmark in April as the Fund was underweight in equities which rose during the month. During the month, the allocation was increased primarily in Fertilizer, Oil & Gas Exploration Companies, and Oil & Gas Marketing Companies sectors, whereas it was reduced primarily in Automobile Assembler, and Cement sectors.
