Robust corporate earnings growth to propel stock market in CY19 and CY20

Economic Outlook: Two months into 2019, the benchmark KSE-100 Index is up by around 5.4% after witnessing a decline of around 8% during CY18 that came on the heels of a 15% correction in CY17. Lackluster performance of the stock market in the previous two years is attributable mainly to a relatively weak corporate earnings growth amid challenging economic conditions emanating from burgeoning Current Account Deficit (CAD) along with lumpy external debt repayments. It resulted in drop of SBP forex reserves from USD 18.1 billion at the start of FY2017 to a paltry USD 8.0 billion currently. The precarious situation prompted the incumbent government to pursue tightening policies including PKR devaluation, monetary policy tightening, and levying and expanding the import duties with the aim to contain domestic consumption. Because of these measures, we have seen a drop in key import heads; however no meaningful compression in overall import numbers in 7MFY19 was visible due to higher global oil prices. Encouragingly, from a peak of around USD 2.1 billion in July 2018, CAD has dropped to USD 0.8 billion in January 2019 and we expect this improvement to sustain in the coming months as well owing to aforementioned tightening measures and slightly lower oil prices. The government has also made great stride in arranging external financing from friendly countries to alleviate pressure on foreign reserves while reportedly negotiations with the IMF are also in its final stages. While the media reports of still stringent conditions by the IMF seem to be the stumbling block but the need for long-standing structural reforms cannot be overemphasized to put the economy on a sustainable growth path and regain macroeconomic stability.

GDP growth is expected to decelerate to around 3% in FY2019 due to dismal performance of manufacturing and agriculture sectors driven by significant monetary tightening, large cut in development spending, and rising cost of doing business as a result of a hefty PKR devaluation and upward adjustments in utility prices. While the Real Effective Exchange Rate (REER) as per the latest data point is now near its equilibrium value, significantly low level of Foreign Exchange Reserves in terms of import cover still necessitates additional PKR devaluation in our view, in order to further curb the trade deficit.

So far, average inflation for 8-month FY 2019 has risen to 6.5% as a result of a large 26% PKR devaluation during CY2018 and higher utility & transportation related costs. We foresee inflation to further rise as government still has to raise utility tariffs in order to reduce subsidy burden while Petroleum products prices may also be raised to generate additional revenues. Average inflation for FY20 is expected to rise to around 9.7% and monthly inflation is likely to peak near 11% in 1HFY20, before gradually tapering off in 2HFY20. After a hefty 4.5% rise in interest rates during the ongoing monetary tightening cycle, the Discount Rate has risen to 10.75%. We expect around 100bps increase in interest rates henceforth as real interest rates would remain in positive territory even after accounting for upward trajectory of inflation and also because of implication of high interest rates for the fiscal side. Expected fall in inflation in second half of FY20 makes a case for decline in interest rates in late FY20.

Stock Market Outlook: From the valuation perspective, the market is trading at an attractive Price-to-Earnings (P/E) multiple of 7.8 times. Led by the Index heavy weight Oil and Gas Exploration & Production, Banking, and Fertilizer sectors; we expect a healthy double-digit corporate earnings growth for 2019 and 2020. There is ample local liquidity sitting on the sidelines, awaiting clarity on the economic policy front. We believe that given attractive valuations, subsiding risks of sharp currency devaluation, and improving external account position; the market would regain its luster for foreign investors post entry into the IMF program. We advise our investors to hold their position in the stock market unfazed by the periodic volatility spikes, keeping their investment objective in mind as the market holds potential to deliver a healthy return in CY19 and CY20.

Stock Market Review

After a sharp recovery of 12% during January, the market lost momentum as investors' attention shifted to the challenging economic outlook with the benchmark KMI 30 Index suffering a decline of 4.0% on a month-on-month basis. The deadly attack in Indian occupied Kashmir overshadowed much awaited historic visit of Crown Prince of Saudi Arabia during which MoUs of investments worth USD20 billion were signed. Furthermore, the ongoing corporate results season with many big names missing even the subdued expectations in terms of profitability and payout also weighed on investors' sentiment. Mounting risk of military conflict with the neighbouring India over alleged involvement of Pakistan backed militant group in the Pulwama attack and subsequent counter Air strikes by the two nations also stoked volatility in the market. The market recovered some losses as tension diffused with the involvement of global community and goodwill gesture shown by the PM Imran Khan by announcing the release of captured Indian pilot. The most noteworthy development on the economic front of the month was a sharp decline in the Current Account Deficit that clocked in at USD0.8 billion for January 2019 versus USD 1.5 billion in the preceding month. The market participants are still uncertain about the timing and conditions of the financing package from the IMF with its implications for the economy and corporate profitability.

During the month, Auto Parts & Accessories, Cement, Banks, Fertilizer, Oil & Gas Exploration, Paper & Board, and Textile Composite sectors performed better than the market whereas, Automobile Assembler, Chemical, Engineering, Oil & Gas Marketing Companies, Pharmaceuticals, Power Generation & Distribution, Refinery, and Technology & Communication sectors lagged behind. During February, Foreign Investors remained net buyers in the market, accumulating fresh positions to the tune of USD 32 million. Similarly, Insurance Companies and Banks/DFIs emerged as large buyers in the market, with net buying of USD 11 million and USD 9 million, respectively. On the other hand, Mutual Funds, Broker Proprietary Trading, and Companies sold positions worth USD 37 million, USD 10 million, and USD 5 million, respectively.

Going forward, we reiterate our view that the stock market would take direction from development on the policy front for addressing vulnerabilities in the external account. From the valuation standpoint, currently the market is trading at an attractive forward Price-to-Earnings (P/E) multiple of 7.8. There is abundant local liquidity ready to enter the market, awaiting policy clarity. We expect net foreign buying during the year against unabated foreign portfolio outflows during the last three years. Taken together, we expect the market to post a healthy return during CY19.

Money Market Review

After recording 7.2% YoY in January 2019, inflation as measured by CPI for February 2019 clocked in at 8.2%. We expect inflation to remain on the upward trajectory and peak near 11% during 1HFY20 as a result of pass-through of measured currency devaluation, hike in utility prices and rising transportation cost. We also expect incessant government borrowing from the banking system to continue to feed inflationary pressure. Consequently, we expect an additional 100 bps increase in interest rates during the ongoing monetary tightening cycle. SBP's net liquid foreign exchange reserves remained stable during February at around USD 8.0 billion compared to USD 8.2 billion in January.

During the outgoing month, SBP held two T-Bill auctions with a combined target of Rs. 2.10 trillion against the maturity of Rs. 2.07 trillion. In the first T-Bill auction, an amount of Rs. 2.13 trillion was accepted at a cut-off yield of 10.55% and 10.60% for 3-month and 6-month tenors, respectively. In the second T-Bill auction, an amount of Rs. 489 billion was realized wherein cut-off yield was maintained at 10.55% for 3-month tenor. In the PIB auction, bids worth around Rs. 233 billion were realized for 3-year, 5-year and 10-year at a cut-off yield of 12.15%, 12.50% and 12.85%, respectively. The bid pattern was skewed towards 3-year tenor. Furthermore, SBP in the recent floating rate PIB auction dated 20-Feb-19 attracted bids worth Rs. 165 billion. Out of the total bids, around Rs. 89 billion was realized at a cut-off margin of 70 basis points over the benchmark (i.e. weighted average yield of the 06-month Market Treasury Bills).

We have calibrated the portfolio of our money market and income funds based on our interest rate outlook and remain alert to any developments that may influence our investment strategy.
