## Over the long-run equities are the best performing asset class

The last two years have not been good for the stock market investors, and some are even questioning their decision to have invested in the stock market. History shows that the stock market beats other investment avenues over the long-run although it can be volatile in the short-time horizon. We examined the past performance of key domestic asset classes for an 18-year period from January 2001 to December 2018. We have included six asset categories for which long-term data is available: Treasury Bills, Bank Deposits, National Savings Schemes (NSS), Pakistan Investment Bonds (PIBs), Capital Protected Strategy (CPS), and Equities. CPS is a synthetic asset class under which portfolio is dynamically managed between the low risk and high-risk components with the aim of capital preservation, while also capturing some upside of the stock market. The results of the CPS are based on back-testing as this strategy was not in practice during this entire period. The inflation as measured by CPI has averaged 7.7% per annum, and Pak Rupee has depreciated against the US Dollar by 5.0% per year, over the last eighteen years.

The historical analysis, as given in the Table below depicts that equities offered the best nominal and real return among all the asset classes. An investment of PKR 100 in equities in January 2001 would be worth PKR 2,459 by the end of December 2018. During the same period, PKR 100 investment in bank deposits or T-bills would have increased to a paltry PKR 268 and PKR 447, respectively.

### Historical Performance of Asset Classes (January 2001 December 2018)

Asset class	Bank Deposit	T-bill	Special Savings Certificates (SSC)	Pakistan Investment Bonds (PIB)	Capital Protected Strategy (CPS)	Equity
Nominal annualized return	5.6%	8.7%	9.7%	11.6%	14.0%	19.5%
Inflation	7.7%	7.7%	7.7%	7.7%	7.7%	7.7%
Real return (adjusted for inflation)	-1.9%	0.9%	1.9%	3.6%	5.9%	10.9%
Annualized Standard Deviation (Risk)	0.5%	1.1%	6.4%	12.1%	7.8%	25.2%
Sharpe Ratio*	N/A**	N/A	0.16	0.24	0.69	0.43
Future Value of Rs. 100 at the end of 18 years - Nominal value	268	447	528	722	1,060	2,459
Future Value of Rs. 100 at the end of 18 years - Real value	71	118	140	191	280	650

\*Sharpe Ratio = Excess return per unit of risk = (Expected return – Risk free rate)/(Standard deviation), we have used 6M T-bill as a proxy for risk free rate

\*\*Due to negative excess return, standard Sharpe ratio is meaningless

Source: SBP Statistical Bulletin, PSX, NSS website, NBP Funds Research

The outcome of the above analysis supports the basic notion that there is a positive relationship between risk and return, meaning higher the risk the higher the return. In line with the expectation, equities exhibited the highest volatility, and bank deposits and T-bills have the lowest risk. Our analysis shows that over a long investment horizon, equities delivered the highest return.

### Value of Rs. 100 at the end of 18 years – Nominal

One takeaway from this analysis is that investors with long-term goals like educating their children, owning a house, or saving for retirement should have some of their assets invested in equities, preferably through equity mutual funds, while investors with low risk appetite based on short investment horizon, should invest in bank deposit or as an alternative in money market / income funds.

**Performance of NAFA Stock Fund (NSF)**  
Since Inception on January 19, 2007 till January 31, 2019

Well managed equity mutual funds have provided investors better returns than the stock market. As a case in point, our flagship equity fund, NAFA Stock Fund has out-performed the stock market by 145% over the last 12 years (since its inception in January 2007 till January 2019) by earning a return of 428% versus 283% rise in the stock market. An investment of Rs.100 in NAFA Stock Fund 12 years ago would have grown to Rs.528 today whereas, an investment of Rs.100 in the stock market (KSE 100 Index) 12 years ago would be worth Rs.383 today. This out-performance of NSF is net of management fee, and all other expenses.

**Future Outlook:**

It has been seen in the past that as goes Pakistan’s current account so goes the stock market. The lackluster performance of the stock market over the last two years is associated with the burgeoning current account deficit and depleting FX reserves. Faced with a large gap in the external account, we reckon that the government will soon enter into a new IMF program despite securing sizable financial help from friendly countries as it still remains critical in reactivating fresh funding lines from multilateral agencies. Current account deficit has remained on the higher side in 1HFY19 (\$1,300 million per month) due to higher oil prices. However, it is likely to drop to \$800 million per month in 2HFY19 as a result of lower oil prices and impact of recently enacted policy measures such as massive currency devaluation, sharp hike in interest rates, and levying & expanding of import duties. The Finance Minister has stated that we are in contact with the IMF, and the gap between the position of the IMF and the government had reduced. Encouragingly, the recently presented mini-budget was seen as pro-investment, pro-growth, and pro-agriculture, which was cheered by the market and equally appreciated by the business community as it addressed some long-standing tax anomalies; reduced enormous tax burden on the stock market/listed sector; streamlined/slashed taxes on the imported raw-material; and expanded duties on the non-essential imports.

Going forward, our positive view on the stock market is underpinned by: (i) attractive valuations as captured in the forward Price-to-Earnings (P/E) multiple of 8.3 times; (ii) expectation of substantial improvement in the current account deficit in the coming months; (ii) double-digit expected corporate earnings growth for the next two years; and (iv) foreign fund managers re-entering the Pakistani stock market. Taken it all together, we hold on to our view that the market is well poised to deliver a healthy return in 2019, and beyond.

## Stock Market Review

After an eye-popping fall of 10.6% in December, the stock market staged a robust recovery during January with the benchmark KMI 30 Index rising handsomely by 11.6% to close the month at 68,267 points. Smart money poured into equities as indiscriminate sell-off during December opened up valuation gap in the broader part of the market, which was trading at a compelling Price-to-Earnings multiple of 7.6 at the 2018 end. Foreign buying in the select stocks during the latter half of the January assuaged the anxiety among the local investors. The market also cheered what we call a pro-investment, pro-growth, and business-friendly mini-budget presented by the Finance Minister on January 23, 2019, offering several tax-relief to the capital market and listed sectors beside removing some tax anomalies. In addition to this, to help shore up dwindling foreign currency reserves, the country received USD 1 billion each from Saudi Arabia and the United Arab Emirates, as part of the bailout package by the two friendly countries. Regarding entry into the IMF programme, the Finance Minister while speaking at a post mini-budget news conference mentioned that the government is in continuous contact with the IMF and the gap between the position of the IMF and the government had reduced and Pakistan would take a Fund programme when it will be expedient for the people of Pakistan.

In our view, the recently enacted policy combination such as sharp hike in policy rate, large PKR devaluation, and levying & expanding scope of duties on the non-essential imports along with a lower global crude oil prices would help contain the trade deficit to a large extent. Moreover, increase in duties on the luxury imports in the mini-budget would further help the situation. Taken together, we see a significant improvement in our current account balance in the coming months as the full impact of these policy actions kicks-in.

Taking a break from the past trend of continued selling, Foreign investors turned net buyers in the market during the outgoing month, accumulating fresh position to the tune of USD 16 million. Alongside Foreign buying, Mutual Funds and Brokers Proprietary Trading emerged as large buyers, with net buying of USD 17 million and USD 8 million, respectively. On the contrary, Insurance Companies, Banks/DFIs, and Individuals remained large sellers, off-loading position worth USD 19 million, USD 10 million, and USD 9 million, respectively.

Going forward, we believe that market would take cue from the decisive development on securing financial package from the IMF and further help from friendly countries that in our view is still inevitable to fill gap in the external account. From the valuation stand point, even after a strong rally of 12% from its recent low of 61,174 points hit on December 31, 2018, the stock market is still trading at an attractive Price-to-Earnings (P/E) multiple of 8.3 and offering around 6% dividend yield. We expect corporate earnings to grow at a healthy double-digit rate for the next two years. There is abundant local liquidity sitting on the sidelines awaiting clarity on the IMF programme to find its way to the stock market. We also feel that against foreign selling over the last three years, foreign portfolio inflows would resume in the equities post entry into the financing programme with the IMF.

## Money Market Review

Against the market consensus of status quo, the State Bank of Pakistan (SBP) in its bi-monthly Monetary Policy review increased the Policy Rate by 25 basis points to 10.25%. SBP stated that the positive impact of recent stabilization measures has started to materialize gradually. The current account deficit is showing early signs of improvements; albeit remains high and acknowledged that inflationary pressure still persists. The realization of bilateral official flows in the last few days have helped increase SBP's net liquid foreign exchange reserves to USD 8.2 billion and the country's FX reserves to USD 14.8 billion as of 25th January 2019.

After recording 6.2% YoY in December 2018, inflation as measured by CPI for January 2019 clocked in at 7.2% due to impact of House Rent change and rise in electricity tariff. CPI inflation during CY2019 is anticipated to remain high – owing to unabated fiscal borrowing by the government, second round impacts of the exchange rate movements, volatility in international oil prices and impact of upward adjustment in gas & electricity tariffs.

During the outgoing month, SBP held three T-Bill auctions with a combined target of Rs. 3.2 trillion against the maturity of Rs. 3.33 trillion. In the first T-Bill auction, an amount of Rs. 577 billion was accepted at a cut-off yield of 10.30% for 3-month tenor. However, SBP received no bids for 6-month and 12-month tenors. In the second T-Bill auction, an amount of Rs. 274 billion was realized wherein cut-off yield were maintained at 10.30% for 3-month. In the third T-Bill auction, an amount of Rs. 111 billion was realized for the 3-month tenors at the same cut-off yield. In the PIB auction, bids worth around Rs. 61 billion were realized for 3-year and 5-year at a cut-off yield of 12.24% and 12.70%, respectively; while bids for 10-year and for 20-year were rejected.

We have calibrated the portfolio of our money market and income funds based on our interest rate outlook and remain alert to any developments that may influence our investment strategy.

## Investment Objective

To earn a reasonable rate of return in a Shariah Compliant manner by investing in Shariah Compliant debt securities, money market instruments and bank deposits.

## Fund Manager Commentary

During the month under review, the Fund posted an annualized return of 8.9% p.a. as compared to the Benchmark return of 3.7% p.a. thus registering an outperformance of 5.2% p.a. This outperformance is net of management fee and all other expenses.

The allocation in corporate Sukuks stood at around 20% of the net assets. Around 47% of net assets of the portfolio are allocated in bank deposits. The higher allocation in bank deposits is due to better yields as compared to other authorized alternative investment avenues.

The weighted average Yield-to-Maturity (YTM) of the Sukuk portfolio is around 11% p.a. and weighted average time to maturity is 3.6 years. The weighted average time to maturity of the Fund is 0.9 year.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

## Investment Objective

To provide competitive return with maximum possible capital preservation by investing in low risk and liquid Shariah Compliant authorized instruments.

## Fund Manager Commentary

The Fund generated an annualized return of 9.1% p.a. for the month of January 2019 versus the Benchmark return of 3.3% p.a thus registering an outperformance of 5.8% p.a. This reported return is net of management fee and all other expenses.

The fund aims to consistently provide better return than the profit rates offered by Islamic Banks / Islamic windows of commercial banks. Minimum eligible rating is AA, while the Fund is not allowed to invest in any security exceeding six months maturity. The weighted average time to maturity of the Fund cannot exceed 90 days while also providing easy liquidity along with a high quality credit profile.

Around 99% of net assets of the Fund are invested in bank deposits which enhances the liquidity profile of the Fund. The weighted average time to maturity of the Fund is 1 day.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

## Investment Objective

The objective of NAFA Islamic Energy Fund is to provide investors with long term capital growth from an actively managed portfolio of Shar'ah Compliant listed equities belonging to the Energy Sector.

## Fund Manager's Commentary

NBP Funds launched its third open-end Islamic Equity Fund namely NAFA Islamic Energy Fund (NIEF) in April, 2016. The aim of the Fund is to provide growth to the investment of unit holders over the long-term in approved Shariah Compliant energy stocks.

NIEF started off the month with an allocation of around 85% in equities, which increased to around 93% towards the end of the month. NIEF underperformed the Benchmark in January as the Fund was overweight in select Energy sectors stocks which underperformed the market. During the month, the allocation was increased primarily Oil & Gas Exploration Companies sector, whereas it was reduced primarily in Oil & Gas Marketing Companies and Refinery sectors.

## Investment Objective

The objective of the Fund is to provide investors an opportunity to earn attractive return from an actively managed portfolio of Shari'ah Compliant Equity Fund and Income Fund.

## Fund Manager's Commentary

NBP Funds launched its NAFA Islamic Active Allocation Plan-I (NIAAP-I) in January, 2016 which is the first plan under NAFA Islamic Active Allocation Fund-I. The Active Allocation Plan is dynamically managed between dedicated equity related and income schemes managed by NBP Funds based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-I has an initial maturity of two years.

Since inception, NIAAP-I has generated a return of 6.9% p.a versus Benchmark return of 7.5% p.a. The current exposure in Income Fund and Equity Fund stands at 20.9% & 72.6%, respectively. The Plan can invest up to 100% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

## Sindh Workers' Welfare Fund (SWWF)

The scheme has maintained provision against Sindh Workers' Welfare Fund's liability to the tune of Rs 4,090,546/-If the same were not made the NAV per unit/ last one year return of scheme would be higher by Rs 0.9071/0.83%. For details investors are advised to read the Note 7 of the Financial Statements of the Scheme for the period ended September 30, 2018.

## Investment Objective

The objective of the Fund is to provide investors an opportunity to earn attractive return from an actively managed portfolio of Shari'ah Compliant Equity Fund and Income Fund.

## Fund Manager's Commentary

NBP Funds launched its NAFA Islamic Active Allocation Plan-III (NIAAP-III) in June 2016 which is the third plan under NAFA Islamic Active Allocation Fund-I. The Active Allocation Plan is dynamically managed between dedicated equity related and income schemes managed by NBP Funds based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-III has an initial maturity of two years.

Since inception, NIAAP-III has generated a return of 4.5% p.a versus Benchmark return of 4.2% p.a. The current exposure in Income Fund and Equity Fund stands at 17.8% & 73.9%, respectively. The Plan can invest up to 100% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

## Investment Objective

The objective of NAFA Islamic Capital Preservation Plan-I is to earn a potentially high return through dynamic asset allocation between Shariah Compliant Dedicated Equity and Money Market based Collective Investment Schemes, while providing Capital Preservation of the Initial Investment Value including sales load at completion of twenty four months and beyond.

## Fund Manager's Commentary

NBP Funds launched its NAFA Islamic Capital Preservation Plan-I (NICPP-I) in February, 2018 which is the fourth plan under NAFA Islamic Active Allocation Fund-II. The Plan is dynamically allocated between the Equity Component and Money Market Component by using the Constant Proportion Portfolio Insurance (CPPI) Methodology. Allocation to Equity Component is generally increased when equity market is rising, while allocation to the Money Market Component is generally increased when the equity market declines. The Plan is presently closed for new subscription. NICPP-I has an initial maturity of two years.

Since inception, unit price of NICPP-I has increased by 2.8% versus the Benchmark return of 1.9%. The current exposure in Money Market Fund and Equity Fund stands at 71.7% & 25.3%, respectively. During the month, maximum multiplier stood at 3.1 whereas minimum multiplier was 2.0.

## Investment Objective

The objective of NAFA Islamic Capital Preservation Plan-II is to earn a potentially high return through dynamic asset allocation between Shariah Compliant Dedicated Equity and Money Market based Collective Investment Schemes, while providing Capital Preservation of the Initial Investment Value including sales load at completion of twenty four months and beyond.

## Fund Manager's Commentary

NBP Funds launched its NAFA Islamic Capital Preservation Plan-II (NICPP-II) in April, 2018 which is the fifth plan under NAFA Islamic Active Allocation Fund-II. The Plan is dynamically allocated between the Equity Component and Money Market Component by using the Constant Proportion Portfolio Insurance (CPPI) Methodology. Allocation to Equity Component is generally increased when equity market is rising, while allocation to the Money Market Component is generally increased when the equity market declines. The Plan is presently closed for new subscription. NICPP-II has an initial maturity of two years.

Since inception, unit price of NICPP-II has increased by 3.4% versus the Benchmark return of 2.4%. The current exposure in Equity Fund stands at 32.1%. During the month, maximum multiplier stood at 3.2 whereas minimum multiplier was 1.7.

## Investment Objective

To earn a reasonable rate of return along with a high degree of liquidity by investing in short-term Shari'ah Compliant bank deposits and money market/debt securities.

## Fund Manager Commentary

During the month, the Fund generated an annualized return of 8.1% against the benchmark return of 3.7%. The performance is net of management fee and all other expenses.

The Fund aims to consistently generate better return than the profit rates offered by Islamic Banks / Islamic windows of commercial banks, while also providing easy liquidity along with a high quality credit profile. The Fund is allowed to invest in Shariah Compliant Government Securities of maturity up to 3 years as well as Shariah Compliant money market and debt securities of up to 2 years maturity rated AA- or better.

Around 25% of net assets of the portfolio are allocated in bank deposits. The weighted average time-to-maturity of the Fund is 138 days.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

## Investment Objective

The objective of the Fund is to provide investors with long term capital growth from an actively managed portfolio of Shari'ah Compliant listed equities.

## Fund Manager's Commentary

NBP Funds launched its second open-end Islamic Equity Fund namely NAFA Islamic Active Allocation Equity Fund (NIAAEF) in January, 2016. The aim of the Fund is to provide growth to the investment of unit holders over the long-term in approved Shariah Compliant equities.

NIAAEF started off the month with an allocation of around 84% in equities, which increased to around 93% towards the end of the month. NIAAEF underperformed the Benchmark in January as the Fund was underweight in select Oil & Gas Exploration Companies and Fertilizer sectors stocks which outperformed the market and overweight in select Commercial Banks, Cement, Technology & Communication, and Vanaspati and Allied Industries sectors stocks which underperformed the market. During the month, the allocation was increased primarily in Oil & Gas Exploration Companies, Oil & Gas Marketing Companies, Fertilizer, and Cement sectors, whereas it was reduced primarily in Commercial Banks, Automobile Assembler, and Glass & Ceramics sectors.
