Historical Performance of Key Investment Avenues

History provides useful insights on future probable outcomes, and guidance for optimal asset allocation, depending upon the risk profile of investors. Recognizing this significance, we have examined the past performance of key domestic asset classes for a 16-year period from January 2001 to December 2016. We have included six categories for which long-term data is available: Treasury Bills, Bank Deposits, National Savings Schemes (NSS), Pakistan Investment Bonds (PIBs), CPS, and Equities. Under the Capital Protected Strategy (CPS), portfolio is dynamically managed between the low risk and high risk components with the aim of capital preservation, while also capturing some upside of the stock market. However, the results from the CPS are based on back-testing and not actual results as this strategy was not in practice during the entire period. The headline inflation (CPI) has averaged 8.0% per annum, and Pak Rupee has depreciated against USD by 3.7% per year, in the last 16 year.

The historical analysis, as given in the Table below, depicts that equities offered the best nominal and real return among all asset classes in our study. An investment of PKR 100 in equities in 2001 would be worth PKR 3,171 by the end of 2016. During the same period, PKR 100 investment in bank deposits or T-bills would have increased to a paltry PKR 247 and PKR 394, respectively.

Asset class	Bank Deposit	T-bill	Special Savings Certificates (SSC)	Pakistan Investment Bonds (PIB)	Capital Protected Strategy (CPS)	Equity
Nominal annualized return	5.8%	8.9%	10.0%	13.6%	15.5%	24.1%
Inflation	8.0%	8.0%	8.0%	8.0%	8.0%	8.0%
Real return (adjusted for inflation)	-2.0%	0.9%	1.9%	5.2%	7.0%	15.0%
Annualized Standard Deviation (Risk)	0.5%	1.2%	6.6%	12.4%	8.0%	25.9%
Sharpe Ratio*	N/A**	N/A	0.17	0.37	0.82	0.58
Future Value of Rs.100 at the end of 16 years - Nominal value	247	394	462	766	1,005	3,171
Future Value of Rs.100 at the end of 16 years - Real value	72	116	136	225	295	930

*Sharpe Ratio = Excess return per unit of risk = (Expected return – Risk free rate)/(Standard deviation), we have used 6M T-bill as a proxy for risk free rate

**Due to negative excess return, standard Sharpe ratio is meaningless

Value of Rs. 100 at the end of 16 years – Nominal

The outcome of the analysis supports the basic notion that there is a positive relationship between risk and return, meaning higher the risk higher the return. As expected, equities exhibited the highest volatility, and bank deposits and T-bills have the lowest risk. Our analysis shows that over a long investment horizon, equities offer the highest return. However, Capital Protected Strategy (CPS) offered the best risk-adjusted return as measured by the Sharpe Ratio during the 16-year period. More specifically, CPS delivered an attractive nominal return of about 15.5% per annum with a relatively low risk level as measured by the standard deviation of 8.0%.

One lesson from this analysis is that investors with long-term goals like educating their children, building a house or saving for retirement should have some of their assets invested in equities, through stock market / equity funds while, investors with low risk appetite based on short investment horizon should investment in bank deposit, T-bills, and money market / income funds.

January 2017

Stock Market Review

The market started CY17 on a strong note, extending the rally that started during the 2nd half of CY16 with the benchmark KSE-100 Index crossing the psychological level of 50,000 on January 26, 2017, first time in its history. However, during the last week the market bucked the trend and lost around 1,400 points (3%) from its peak hit on January 26, 2017. As we see it, this market correction is linked to selling by the local investors in reaction to the apex regulator serving notices against the brokers regarding the in-house badla financing. Mr. Trump's decision to enact travelling ban against the nationals of select Islamic countries also stoked fear and anxiety among the investors. As the market decline during the last four trading sessions of the month, the court proceedings of Panama Leaks case, which were ignored previously, started drawing the focus of investors. In addition to this, foreign selling continued with net outflow of US \$ 111 million during the month. The corporate result season kicked-off with majority of the announcements coming in line with the market expectation so far.

During the month, Automobile Assembler, Chemicals, Engineering, Fertilizer, Pharmaceuticals, Power Generation & Distribution, and Refinery sectors performed better than the market while, Cement, Commercial Banks, Oil & Gas Exploration sectors lagged behind. Robust volumetric growth, healthy profit margins, and launching of new models drew investors toward the Automobile Assembler sector. Government decision to allow urea export of around 300,000 ton, some increase in global fertilizer prices, and better off-take numbers resulted in the out-performance of the Fertilizer sector. Power Generation & Distribution sector out-performed on the back of tariff approval of upcoming power plant of a select company and further infrastructure expansion plan by the gas distribution companies. Engineering sector continued the bull run amid robust actual and expected earnings growth of flat-roll producers post imposition of antidumping duty against the Chinese imports. Expectation of robust earnings announcement resulted in strong performance of the Refinery sector. Cement sector took a breather after a long stretch of out-performance. Banking sector lagged behind amid large foreign selling. Led by correction in global oil prices the Oil and Gas Exploration & Production sector lagged the market.

We believe that the market is well poised to deliver a healthy double digit return during CY17 with our view premised on improving macroeconomic outlook, reasonable relative valuations, strong corporate earnings growth, benign actual & anchored expected near-term inflation & interest rates, ample local liquidity, and expectation of foreign inflows from the funds tracking MSCI EM index. We recommend investors to keep a long term perspective in mind and avoid knee-jerk reaction that is usually associated with swings in the market. We also advise investors to brace for volatility spikes driven by global policy uncertainty and rising noise in the domestic politics.

Money Market Review

In line with our expectation, inflation as measured by CPI clocked in at 3.7% another benign reading, owing to stability in commodity prices & exchange rate; and partial pass-through of increase in global oil prices. State Bank of Pakistan (SBP) in its bi-monthly Monetary Policy Statement maintained policy rate at 5.75% in line with the market consensus, citing satisfaction over the current macroeconomic stability, healthy private sector credit off-take, encouraging progress on CPEC related investment activity, and relatively easy liquidity conditions. However, SBP expressed concerns on declining exports receipts and tapering remittances. We reiterate our view that medium term sustainability of balance of Payment position entails critical structural reforms aimed at exports growth. We see a gradual uptick in inflation going forward on account of partial recovery in global oil prices and its pass-through; measured PKR depreciation; and healthy monetary expansion amid unabated government borrowing & pick up in private sector growth.

During the month, SBP held two T-Bill auctions with a combined target of Rs. 650 billion and a maturity of Rs. 654 billion. In the first T-Bill auction, an amount of Rs. 256 billion was realized against the target of Rs. 200 billion and maturity of Rs. 159 billion at cut-off yield of 5.95% for 3 month tenor and 5.99% for 6 month and 12 month tenors. The bid pattern skewed towards 06 month tenor as compared to 03 and 12 month tenors. In the second T-Bill auction, Ministry of Finance (MoF) realized Rs. 538 billion against the target of Rs. 450 billion and maturity of Rs. 495 billion. Cut-off yields declined to 5.90%, 5.93% and 5.96% for 03 month, 06 month and 12 month tenors, respectively. The bid pattern remained tilted towards 06 month tenor as compared to 03 and 12 month tenors. In the PIB auction during the month, an amount of Rs. 39 billion was accepted against the target of Rs. 50 billion and maturity of Rs. 117 billion at cut-off yield of 6.41%, 6.90% and 7.94% in the 03 year, 05 year and 10 years, respectively while, no bid was received in 20 year tenors.

We have positioned the portfolio of our money market, income funds, and advisory mandates based on our capital market expectations.

Investment Objective

To earn a competitive rate of return while preserving capital to the extent possible by investing in liquid assets.

Fund Manager Commentary

The Fund posted an annualized return of 8.2% during January 2017 versus the Benchmark return of 6.1%. Outperformance during the month was on account of reversal of Workers' Welfare Fund's (WWF) provisioning. The annualized return during FYTD is 7.0% against the Benchmark return of 6.1%, hence an outperformance of 0.9% p.a. This outperformance is net of management fee and all other expenses.

As the allocation of the Fund shows, exposure in TFCs and Sukuks stands at 19.3% of net assets. All TFCs in the Fund are floating rate instruments linked to KIBOR.

The weighted average Yield-to-Maturity of the Fund is around 6.8% p.a. while its weighted average time to maturity is 0.5 year. This yield does not include potential recovery in fully provided TFCs (Face Value of around Rs. 309 million), which is potential upside for the Fund. Thus, the Fund is expected to perform well over the medium to long term horizon. However, since TFCs prices may go up or down, therefore, only investors with medium term investment horizon are advised to invest in this Fund.

We will rebalance the allocation of the fund proactively based on the capital market outlook.

Investment Objective

To earn a reasonable rate of return along with a high degree of liquidity by investing in short-term Shari'ah compliant banks deposits and money market/debt securities.

Fund Manager Commentary

During the month under review, the Fund has generated an annualized return of 1% against the benchmark return of 2.8%. Underperformance was due to provision of Sindh Workers' Welfare Fund liability. The performance is net of management fee and all other expenses.

The Fund aims to consistently generate better return than the profit rates offered by Islamic Banks / Islamic windows of commercial banks, while also providing easy liquidity along with a high quality credit profile. The Fund is allowed to invest in shariah compliant Government Securities of maturity up to 3 years as well as Shariah compliant money market and debt securities of up to 2 years maturity rated AA- or better.

Around 99.6% of net assets of the portfolio is allocated in bank deposits. The higher allocation in bank deposits is due to better yields as compared to other authorized alternative investment avenues. The weighted average time-to-maturity of the Fund is 1 day.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.
