Stock Market Review

The rally at local bourses that started from the recent lows hit in the last week of February picked up steam during the month led by Automobile Assemblers, Cement, and Oil & Gas Marketing sectors. Emerging markets are witnessing some resumption in portfolio inflows as leading global fund managers have upgraded emerging markets on the back of abatement of headwinds to the emerging economies emanating from the stronger US Dollar, collapsing commodities, and regional political fluidity. Moreover, global and regional sell-off in the risk assets, including equities, in the wake of UK voters' decision to leave EU reversed trend as the markets recalibrated the impact on the global and emerging economies from the so-called Brexit. Prospects of healthy inflows into local equities post PSX's reclassification into widely tracked MSCI EM Index effective May 2017 kept the local investors upbeat. Landslide victory of the central government in the recently held AJK general elections improved the legitimacy of the federal government, lending strength to the democratic process in the country. During the month, the benchmark KSE 100 Index advanced by around 4.6%, taking CY16 increase to around 20%.

Turning to the sectoral performance during the month, Automobile Assemblers, Cement, Engineering, Textile Composite and Refinery sectors performed better than the market while Oil & Gas Exploration and Fertilizer sectors lagged behind. Robust volumetric growth, healthy profit margin, and launch of new model by one of the major players drew investors towards the Automobile & Assemblers sector. Cement sector continued robust performance amid foreign buying on the expectation of strong growth prospects driven by rising construction activity under CPEC. Expectation of healthy earnings announcement in the ongoing result season was a key catalyst for the out-performance of the Oil & Gas Marketing sector. Textile composite sector drew investors' interest on the news of increase in yarn prices which should filter down to value-added products. Refinery sector extended the rally on the expectation of robust earnings announcements. Renewed decline in the crude oil prices resulted in the lagged performance of the Oil & Gas Exploration sector. Banking sector performed in line with the market helped by some foreign interest and accumulation by select under invested local institutions.

Currently, the market is trading at around 9.3 times estimated earnings. Going forward, we hold a sanguine view on the equities premised on relatively attractive stock market valuations, benign near-term inflation & interest rate outlook, improving macroeconomic prospects, and expectation of healthy portfolio inflows. However, we acknowledge that volatility may spike after the recent calm on the back of expected escalation in domestic political climate, fluidity in global politics, concerns on the global growth, and global policy uncertainty.

Money Market Review

During the month, State Bank of Pakistan (SBP) maintained policy rate at 5.75% in its bi-monthly Monetary Policy announcement, citing improving economic prospects, comfortable FX reserves position, prudent fiscal management, and benign near-term inflation outlook being balanced against latent risks to external accounts from sudden increase in oil prices, slowdown in foreign remittances and slowing exports. During the month, sovereign yield responded to maturity of PIB amounting to Rs. 1,353 billion with a decline of 10-15 bps, reflecting increased appetite of commercial banks and other financial institutions. Monetary outflows from this maturity of PIBs were partially utilized to adjust SBP OMO, which reduced from a record high of Rs. 2 trillion to Rs. 913 billion at month end. Inflation as measured by CPI for July16 clocked in at 4.1% as compared to 3.2% for the last month due to pick-up in perishable food item prices and increase in house rent component.

SBP held two T-Bill auctions during the month with a combined target of Rs. 400 billion and a maturity of Rs. 277 billion. In the first T-Bill auction, an amount of Rs. 218 billion was accepted against the target of Rs. 200 billion and maturity of Rs. 144 billion at a cut-off yield of 5.87%, 5.91% and 5.91% for 3 month, 6 month and 12 month tenors, respectively. Bid pattern skewed towards 12 months as compared to 3 month and 6 month tenors. In the second T-Bill auction, Ministry of Finance (MoF) accepted Rs. 424 billion against the target of Rs. 200 billion and maturity of Rs. 133 billion. Cut-off yields declined to 5.81%, 5.84% and 5.86% for 3 month, 6 month and 12 month tenors, respectively. Bid pattern tilted towards 6 months as compared to 3 month and 12 month. In the PIB auction held on 13-Jul-2016, an amount of Rs. 238 billion was accepted against the target of Rs. 100 billion and maturity of Rs. 1,353 billion at a cut-off yield of 6.21%, 6.7% and 7.8% in the 3 year, 5 year and 10 year tenors respectively, while no bid was accepted in 20 year tenor.

We have positioned the portfolio of our money market and income funds based on our capital market expectations. We are closely monitoring the developments in the capital markets and will rebalance the portfolio accordingly.

Investment Objective

To minimize risk, preserve capital and generate a reasonable return along with a high degree of liquidity from a portfolio primarily constituted of bank deposits and money market instruments.

Fund Manager Commentary

The Fund earned an annualized return of 5.5% during the month versus the Benchmark return of 4.3% thus registering an outperformance of 1.2% p.a. Since its launch in November 2009, the Fund offered an annualized return of 8.9% against the Benchmark return of 7.1%, hence an outperformance of 1.8% p.a. This outperformance is net of management fee and all other expenses.

NSPF is one of the highest rated income funds in the market due to its restrictive investment guidelines. The Fund is allowed to invest in Government Securities up to a maximum maturity of 3 years and also in debt securities with rating of A and above with a maximum remaining maturity of 1 year. The Fund invests 25% of its net assets in less than 90 days T-Bills or saving accounts with banks, which further enhances liquidity profile of the Fund.

The portfolio of NSPF is invested in Treasury bills, MTS, and bank deposits etc. The allocation in MTS is around 25% of net assets. The weighted average time to maturity of the Fund is around 22 days. Our internal guidelines permit MTS financing in only fundamentally strong companies with lower volatility. It is pertinent to mention that in this asset class the Fund provides financing at only pre-determined rates of return with no direct exposure to the stock market.

We will rebalance the allocation of the portfolio proactively based on the capital market outlook.

Investment Objective

To provide preservation of capital and earn a reasonable rate of return along with a high degree of liquidity by investing in short-term Shariah compliant banks and money market / debt securities.

Fund Manager Commentary

The Fund generated an annualized return of 5.5% for the month of July 2016 versus the Benchmark return of 4.4% thus registering an outperformance of 1.1% p.a. During FY16 the Fund has outperformed its Benchmark by 0.6% by earning an annualized return of 5.5%. This outperformance is net of management fee and all other expenses.

The Fund aims to consistently provide better return than the profit rates offered by Islamic Banks / Islamic windows of commercial banks, while also providing easy liquidity along with a high quality credit profile. The Fund is allowed to invest in short-term Shariah compliant money market securities of up to six months maturity rated AA- or better. The Fund is not authorized to invest in corporate debt securities and equities.

The allocation of the Fund is 9.6% in GOP Ijarah Sukuks, which are floating rate instruments with 6-months coupon re-setting. Around 89% of the portfolio is invested in bank deposits which enhances the liquidity profile of the Fund. The weighted average time to maturity of the Fund is 87 days.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

To seek preservation of capital and earn a reasonable rate of return in a Shariah compliant manner.

Fund Manager Commentary

During the month under review, the Fund posted an annualized return of 5.8% as compared to the Benchmark return of 4.5% thus registering an outperformance of 1.3% p.a. During CYTD, the Fund has posted 6.6% annualized return versus 4.6% by the Benchmark, hence an outperformance of 2.0% p.a. This outperformance is net of management fee and all other expenses.

The allocation in corporate Sukuks stood at around 1.7% of the assets. Around 92.8% of the portfolio is allocated in bank deposits. The higher allocation in bank deposits is due to better yields as compared to other authorized alternative investment avenues.

The weighted average Yield-to-Maturity (YTM) of the Sukuk portfolio is around 5.4% p.a. and weighted average time to maturity is 2.2 years. The weighted average time to maturity of the Fund is 48 days.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

To seek maximum possible preservation of capital and a reasonable rate of return via investing primarily in money market & debt securities having good credit rating and liquidity.

Fund Manager Commentary

The Fund posted an annualized return of 12.2% in July 2016 as compared to the Benchmark return of 6.0% due to principal & markup payment of a non-performing sukuk. During CYTD the Fund has outperformed its Benchmark by 1.0% by earning an annualized return of 7.3%. This outperformance is net of management fee and all other expenses.

The weighted average Yield to Maturity of the Fund is around 7.1% p.a. and that of the TFC portfolio is 6.5% p.a. The weighted average time to maturity of the Fund is around 0.2 year. The Fund's sector allocation is fairly diversified with exposure to Electricity, Banking, and Financial Services sectors. TFC portfolio of the Fund is predominantly floating rate linked to KIBOR. However, since TFCs prices may go up or down, therefore, only investors with medium-term investment horizon are advised to invest in this Fund.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

To earn a competitive rate of return while preserving capital to the extent possible by investing in liquid assets.

Fund Manager Commentary

The Fund posted an annualized return of 8.6% during July 2016 versus the Benchmark return of 6.0% due to mark to market gain in Power Generation and Distribution sector sukuk. This outperformance is net of management fee and all other expenses.

As the allocation of the Fund shows, exposure in TFCs and Sukuks stands at 27.9% of net assets. All TFCs in the Fund are floating rate instruments linked to KIBOR.

The weighted average Yield-to-Maturity of the Fund is around 7.3% p.a. while its weighted average time to maturity is 0.8 year. This yield does not include potential recovery in fully provided TFCs (Face Value of around Rs. 309 million), which is potential upside for the Fund. Thus, the Fund is expected to perform well over the medium to long term horizon. However, since TFCs prices may go up or down, therefore, only investors with medium term investment horizon are advised to invest in this Fund.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

The objective of NAFA Islamic Principal Protection Fund-I is to earn a potentially high return through dynamic asset allocation between shariah compliant Equities and Money Market investment avenues, while providing principal protection.

Fund Manager's Commentary

Since inception, NIPPF- I has generated a cumulative return of 34.9% versus 27.3% return of the Benchmark. The current equity exposure stands at around 47%. During the month, maximum multiplier stood at 2.1 whereas minimum multiplier was 2.0. Key holdings of the Fund belong to Cement, Oil & Gas Exploration Companies, and Oil & Gas Marketing Companies sectors. The Fund can invest up to 50% in equities subject to cushion availability. We are confident that the Fund will generate good returns considering the improved macroeconomic and political outlook and built in dynamic equity allocation mechanism of the Fund.

Investment Objective

The objective of NAFA Islamic Principal Protection Fund-II is to earn a potentially high return through dynamic asset allocation between Shariah compliant Equities and Money Market investment avenues, while providing principal protection.

Fund Manager's Commentary

Since inception, NIPPF- II has generated a cumulative return of 31.3% versus 26.8% return of the Benchmark. The current equity exposure stands at around 69%. During the month, maximum multiplier stood a 3.3 whereas minimum multiplier was 2.8. Key holdings of the Fund belong to Cement, Oil & Gas Marketing Companies, and Textile Composite sectors. The Fund can invest up to 100% in equities subject to cushion availability. We are confident that the Fund will continue to generate good returns considering the improved macroeconomic and political outlook and built in dynamic equity allocation mechanism of the Fund.

Investment Objective

The objective of the Fund is to provide investors an opportunity to earn attractive return from an actively managed portfolio of Shari'ah Compliant Equity Fund and Income Fund.

Fund Manager's Commentary

NAFA launched its NAFA Islamic Active Allocation Plan-I (NIAAP-I) in January, 2016 which is the first plan under NAFA Islamic Active Allocation Fund-I. The Active Allocation Plan will be dynamically managed between dedicated equity related and Income schemes managed by NAFA based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-I has an initial maturity of two years.

Since inception, NIAAP-I has generated a return of 16.7% versus 21.6% return of the Benchmark. The current exposure in Equity Fund and Income Fund stands at 81.2% & 14.5% respectively. The Plan can invest up to 100% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

Investment Objective

To earn a reasonable rate of return along with a high degree of liquidity by investing in short-term Shari'ah compliant banks deposits and money market/debt securities.

Fund Manager's Commentary

During the month under review, the Fund has generated an annualized return of 2.9% against the benchmark return of 4.4%. The performance is net of management fee and all other expenses.

The Fund aims to generate better returns than the profit rates offered by Islamic Banks / Islamic windows of commercial banks, while also providing easy liquidity along with a high quality credit profile. The Fund is allowed to invest in shariah compliant Government Securities of maturity up to 3 years as well as Shariah compliant money market and debt securities of up to 2 years maturity rated AA- or better.

Around 60% of the portfolio is allocated in bank deposits. The higher allocation in bank deposits is due to better yields as compared to other authorized alternative investment avenues. The weighted average time to maturity of the Fund is 1 day.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

The objective of the Fund is to provide investors with long term capital growth from an actively managed portfolio of Shari'ah Compliant listed equities.

Fund Manager's Commentary

NAFA launched its second open-end Islamic Equity Fund namely NAFA Islamic Active Allocation Equity Fund (NIAAEF) in January, 2016. The aim of the Fund is to provide growth to the investment of Unit holders over the long-term in approved Shariah compliant equities.

NIAAEF started off the month with an allocation of around 70% in equities, which increased to 87% at the end of the month. NIAAEF outperformed the Benchmark in July as the Fund was underweight in select Oil & Gas Exploration Companies, Power Generation & Distribution Companies, Fertilizer, and Food & Personal Care Products sectors stocks which underperformed the market and overweight in select Automobile Assembler, Oil & Gas Marketing Companies, Glass & Ceramics, and Cement sectors stocks which outperformed the market. During the month, the allocation was primarily increased in Automobile Assembler, Engineering, Textile Composite, and Fertilizer sectors whereas it was reduced primarily in Refinery and Pharmaceuticals sectors.

Investment Objective

The objective of NAFA Islamic Energy Fund is to provide investors with long term capital growth from an actively managed portfolio of Shari'ah Compliant listed equities belonging to the Energy Sector.

Fund Manager's Commentary

NAFA launched its third open-end Islamic Equity Fund namely NAFA Islamic Energy Fund (NIEF) in April, 2016. The aim of the Fund is to provide growth to the investment of Unit holders over the long-term in approved Shariah compliant energy stocks.

NIEF started off the month with an allocation of around 70% in equities, which increased to around 85% towards the end of the month. NIEF underperformed the Benchmark in July as the Fund was overweight in Oil & Gas Exploration Companies sector stocks which underperformed the market. During the month, the allocation was primarily increased in Oil & Gas Marketing Companies, Oil & Gas Exploration Companies, and Power Generation & Distribution sectors whereas it was reduced primarily in Refinery sector.
