Stock Market Outlook for FY2018

Despite a lackluster performance during the second half amid amplified volatility, the stock market delivered a healthy return of 23.2% in FY17 on the back of stellar performance during the period from Jun-Dec 2016. During FY17, our flagship NAFA Stock Fund (NSF) has delivered a 33.7% return to our investors, thus out-performing the stock market by 10.5%. This return is net of management fee and all other expenses. We attribute subdued performance of the stock market during the second half of FY2017 to heightened political uncertainty, large foreign net selling to the tune of USD332 million, and mounting risks to the Balance of Payment position. Elevated domestic political uncertainty linked to Panama Leaks case remained on the forefront, sending jitters in the market. Adding to the local market participants woes was a cumulative net foreign out-flows of USD133 million during May and June 2017, contrary to the market expectation of sizeable inflows from the tracker funds amid reclassification of PSX into widely followed MSCI Emerging Market Index. The stock market has declined by 11.9% from its peak hit on May 24, 2017.

In near term, we reckon that political noise is expected to remain elevated due to expected Panama leaks judgment, and repercussions of this unprecedented case on the upcoming elections. However, as schedule for the upcoming elections draws near, this uncertainty is likely to gradually subside, in our view. Setting aside election related priorities, the incoming government in its first year is expected to embark on the stalled economic reforms, and will also have a mandate to negotiate with multilateral agencies to secure a financing package.

A genuine concern about the economy is how the government will manage surging trade and current account deficits. In our view, in addition to lowering the cost of doing business, a key remedy in this regard is measured PKR devaluation, which would help in arresting non-essential imports, and augment exports to some extent by partially restoring our international competitiveness. The government has so far resisted this step due to political consideration as this is expected to have a negative impact on inflation, interest rates and debt servicing costs. However, given hefty rise of 39% YoY basis in the trade deficit during 11MFY17, and consequent pressures on forex reserves, some devaluation is inevitable.

Nonetheless, Pakistan's economy continues to grow strongly with GDP growth clocking in at 5.3% for FY2017 (the highest in the past decade). With FX reserves equivalent to 17 weeks of imports, though driven by inflows under the financial accounts, we don't see imminent Balance of Payment crisis. We expect GDP growth rate to exceed 5% in FY18 as well, as projects under CPEC gather pace, while we expect inflation to show a gradual rise along with some uptick of 75-100bps in interest rates during FY18. In the backdrop of heightened noise in domestic politics we may continue to see elevated volatility in the short-term. However, considering ample domestic liquidity and attractive valuation of the stock market, we expect limited downside from the current levels even in a scenario of negative decision in Panama case for the incumbent government. We hold a positive outlook on the stock market for long term investors on the back of improving economic growth, benign near-term inflation & interest rate outlook, abundant local liquidity, compelling relative valuations of PSX Price-to-Earnings ratio (P/E) of 9.8x relative to other Emerging Market countries (MSCI EM Index P/E of 15.4x), and healthy corporate earnings growth of 12-15% for FY18 & FY19. We expect foreign inflows to resume in due course as the recent decline

has widened valuation gap vis-à-vis regional markets, and mitigation of currency risk post expected measured devaluation in the near-term. In view of the foregoing, we expect the stock market to deliver an attractive double digit return in FY18.

It is very difficult, if not impossible, to time the stock market. Therefore, we suggest our investors to hold their positions in the stock market / funds, and wait for the stock market to gradually recover in FY18.

Stock Market Review

For the stock market, month of June literally proved what is called in the capital market parlance “June swoon” as the benchmark KSE 100 index tanked 4,026 points (or 8%) to close at 46,565 levels after hitting a low of 44,914 levels (decline of 11.2% from previous month close) on June 20, 2017. However, despite surrendering some gains during June, the stock market delivered a healthy return of 23% during FY2016-17. As we see it, the recent sell-off largely owes to investors’ anxiety emanating from the news and the media coverage surrounding Panama Leaks investigation by the JIT against the PM & his family. The consequent political uncertainty also weighed on the economy as reforms efforts stalled, exacerbating the rising risks from the deteriorating Balance of Payment (BoP) position as a result of widening trade deficit. The negative sentiments in the market also drew investors’ attention to the newfound geopolitical uncertainty in the Middle East due to economic and financial linkages with Pakistan. On the positive side, the stock market demonstrated resilience during FY2016-17 in the face of a staggering net foreign selling to the tune of US \$ 652 million. Upbeat local investors shrugged off elevated domestic political uncertainty, rising global political fluidity emanating from the ascent of populism, and large foreign outflows while putting more focus on attractive valuations, improving economic prospects, solid corporate earnings growth, improving business sentiments, and limited alternative investment avenues. Adding to the local investors’ optimism was much hyped jump start of investment activity in infrastructure and power sectors under CPEC, seeking to address the critical structural bottlenecks facing domestic economy.

Turning to the sectoral performance during the month, Automobile Assembler, Cement, Chemical, Commercial Bank, Power Generation & Distribution sectors performed better than the market while, Oil & Gas Exploration, Oil Marketing Companies, Paper & Board, Engineering, Refinery, and Transport sectors lagged behind. Improving earnings outlook, reasonable valuations, and under-positioning resulted in the outperformance of Automobile sector. Cement sector depicted resilience during this indiscriminate selling episode after underperformance during the last couple of months due to pressures on the profit margins driven by rise in global coal prices and cut in domestic cement price. Recovery was witnessed in the banking sector as stocks regained value after heavy correction as MSCI related euphoria subsided. Stocks belonging to Oil & Gas Exploration and Oil Marketing Companies came under pressure amid renewed fall in global crude oil prices. After robust rally, the Engineering sector depicted subdued performance in the wake of rising political uncertainty.

In our base case scenario, we see that domestic political developments may send jitters in the market sporadically but unlikely to derail fundamentals of the economy and the stock market. We hold a positive view on the stock market premised on attractive valuations as reflected by the forward P/E multiple of 9.8 times; healthy corporate earnings growth of 12%-15% for CY17 & CY18; benign near-term inflation and interest rate outlook; improving economic growth prospects; and abundant local liquidity. However, rising noise in the domestic politics, regional geopolitical fluidity, and global policy uncertainty may keep the volatility elevated.

Money Market Review

After recording 5.02% YoY in May 2017, inflation as measured by the CPI for June 2017 clocked in at 3.9%. Helped by official receipt of US Dollar 622 million from Asian Development Bank (ADB) and US Dollar 106 million from the World Bank, foreign exchange reserves stood at USD 21.4 billion at the end of month. However, pressures are mounting to the BoP due to widening trade deficit. While soft commodity prices bode well for the BoP position, inflation, and interest rate outlook in the near term, arresting the widening trade deficit holds the key for the medium term financial stability. We see measured PKR depreciation of 5-10% during FY2017-2018 to partially restore export competitiveness and to curtail unnecessary imports. In our base case scenario, with gradual pick-up in inflation, we expect 75-100 bps increase in the policy rate over the next one year.

During the month of June, in the first T-Bill auction, an amount of Rs. 161 billion was realized against the target of Rs. 300 billion and maturity of Rs. 217 billion at a cut-off yield of 5.99%, 6.01% and 6.05% for 3 month, 6 month and 12 month tenors. In the second T-Bill auction, an amount of Rs. 355 billion was realized against the target of Rs. 300 billion and maturity of Rs. 211 billion. Cut-off yield for 3 month and 6 month tenor were maintained while, cut-off yield for 12 month tenor was recorded at 6.04%. The bid pattern skewed towards 3 month tenor. In the PIB auction, MoF received collective bids worth Rs. 95 billion wherein an amount of Rs. 78 billion was realized for 3 year, 5 year and 10 year tenors against the target of Rs. 50 billion and maturity of Rs. 7 billion at a cut-off yield of 6.41%, 6.90% and 7.94% respectively, while, no bid was received in 20 years tenor. In 3-Year Fixed Rental Rate GOP Ijara Sukuk (GIS-FRR) auction an amount of Rs. 71 billion was realized in line with the maturity amount at a yield of 5.24%.

We have adjusted the portfolio of our money market and income funds based on the capital market expectations and are closely monitoring the developments in the capital markets and will rebalance the portfolio accordingly.

Investment Objective

To provide competitive return from portfolio of low credit risk by investing primarily in Government Securities.

Fund Manager Commentary

During the month under review, the Fund has generated an annualized return of 4.5% against the benchmark return of 6.0%. Since its launch in July 2014, the Fund offered an annualized return of 8.7% against the Benchmark return of 7.1%, hence an outperformance of 1.6% p.a. This outperformance is net of management fee and all other expenses.

NAFA Government Securities Savings Fund (NGSSF) invests a minimum of 70% in Government Securities. The Fund invests a minimum 10% of its assets in less than 90 days T-Bills or saving accounts with banks, which enhances liquidity profile of the Fund.

As the asset allocation of the Fund shows, exposure in Government Securities was around 44% of the Total Assets and 83% of Net Assets at the end of the month with average Yield to Maturity of 5.96% p.a. Last one year allocation in Government Securities was around 79% of net assets. The weighted average time-to-maturity of the Fund is 5 days.

We will rebalance the allocation of the fund proactively based on the capital market outlook.

Investment Objective

To minimize risk, preserve capital and generate a reasonable return along with a high degree of liquidity from a portfolio primarily constituted of bank deposits and money market instruments.

Fund Manager Commentary

The Fund earned an annualized return of 6.3% during the month versus the Benchmark return of 6.2% thus registering an outperformance of 0.1% p.a. Since its launch in November 2009, the Fund has offered an annualized return of 8.9% against the Benchmark return of 7.0%, hence an outperformance of 1.9% p.a. This outperformance is net of management fee and all other expenses.

The Fund is allowed to invest in Government Securities up to a maximum maturity of 3 years and also in debt securities with rating of A and above with a maximum remaining maturity of 1 year. The Fund invests 25% of its net assets in less than 90 days T-Bills or saving accounts with banks, which further enhances liquidity profile of the Fund.

The portfolio of NSPF is invested in Treasury bills, MTS, and bank deposits etc. The allocation in MTS is around 21.0% of net assets. The weighted average time to maturity of the entire Fund is around 27 days. Our internal guidelines permit MTS financing in only fundamentally strong companies with lower volatility. It is pertinent to mention that in this asset class the Fund provides financing at only pre-determined rates of return with no direct exposure to the stock market.

We will rebalance the allocation of the portfolio proactively based on the capital market outlook.

Investment Objective

To provide preservation of capital and earn a reasonable rate of return along with a high degree of liquidity by investing in short-term Shariah compliant banks and money market / debt securities.

Fund Manager Commentary

The Fund generated an annualized return of 6.2% for the month of June 2017 versus the Benchmark return of 2.4% thus registering an outperformance of 3.8% p.a. During FY2017, the Fund has outperformed its Benchmark by 2.8% by earning an annualized return of 5.9%. This outperformance is net of management fee and all other expenses.

The Fund aims to consistently provide better return than the profit rates offered by Islamic Banks / Islamic windows of commercial banks, while also providing easy liquidity along with a high quality credit profile. The Fund is allowed to invest in short-term Shariah compliant money market securities of up to six months maturity rated AA- or better. The Fund is not authorized to invest in corporate debt securities and Equities.

The allocation of the Fund in GOP Ijarah Sukuks is around 4.8% of net assets, which are floating rate instruments with 6-months coupon re-setting. Around 96% of net assets of the portfolio are invested in bank deposits which enhance the liquidity profile of the Fund. The weighted average time to maturity of the fund is 26 days.

We will rebalance the allocation of the fund proactively based on the capital market outlook.

Investment Objective

To earn a reasonable rate of return in a Shariah compliant manner by investing in Shariah compliant debt securities, money market instruments and bank deposits.

Fund Manager Commentary

During the month under review, the Fund posted an annualized return of 7.1% as compared to the Benchmark return of 2.4% thus registering an outperformance of 4.7% p.a. During FY17, the Fund has posted 5.4% annualized return versus 3.9% by the Benchmark, hence an outperformance of 1.5% p.a. This outperformance is net of management fee and all other expenses.

The allocation in corporate Sukuks stood at around 0.6% of the net assets. Around 87% of net assets of the portfolio is allocated in bank deposits. The higher allocation in bank deposits is due to better yields as compared to other authorized alternative investment avenues.

The weighted average Yield-to-Maturity (YTM) of the Sukuk portfolio is around 4.9% p.a. and weighted average time to maturity is 2.6 years. The weighted average time to maturity of the Fund is 83 days.

We will rebalance the allocation of the fund proactively based on the capital market outlook.

Investment Objective

To seek maximum possible preservation of capital and a reasonable rate of return via investing primarily in money market & debt securities having good credit rating and liquidity.

Fund Manager Commentary

The Fund posted an annualized return of 6.2% in June 2017 as compared to the Benchmark return of 6.2%. During FY17 the Fund has outperformed its Benchmark by 0.2% by earning an annualized return of 6.3%. This outperformance is net of management fee and all other expenses.

The weighted average time to maturity of the Fund is around 0.4 year. The Fund's sector allocation is fairly diversified with exposure to Banking and Financial Services sectors. TFC portfolio of the Fund is predominantly floating rate linked to KIBOR. However, since TFCs prices may go up or down, therefore, only investors with medium-term investment horizon are advised to invest in this Fund.

We will rebalance the allocation of the fund proactively based on the capital market outlook.

Investment Objective

To earn a competitive rate of return while preserving capital to the extent possible by investing in liquid assets.

Fund Manager Commentary

The Fund posted an annualized return of 6.2% during June 2017 versus the Benchmark return of 6.2%. The annualized return during FY17 is 6.5% against the Benchmark return of 6.1%, hence an outperformance of 0.4% p.a. This outperformance is net of management fee and all other expenses.

As the allocation of the Fund shows, exposure in TFCs and Sukuks stands at 11.2% of net assets. All TFCs in the Fund are floating rate instruments linked to KIBOR.

The weighted average time to maturity of the Fund is 0.5 year. This yield does not include potential recovery in fully provided TFCs (Face Value of around Rs. 309 million), which is potential upside for the Fund. Thus, the Fund is expected to perform well over the medium to long term horizon. However, since TFCs prices may go up or down, therefore, only investors with medium term investment horizon are advised to invest in this Fund.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

The objective of the Fund is to provide investors an opportunity to earn attractive return from an actively managed portfolio of Shari'ah Compliant Equity Fund and Income Fund.

Fund Manager's Commentary

NAFA launched its NAFA Islamic Active Allocation Plan-I (NIAAP-I) in January, 2016 which is the first plan under NAFA Islamic Active Allocation Fund-I. The Active Allocation Plan is dynamically managed between dedicated equity related and Income schemes managed by NAFA based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-I has an initial maturity of two years.

Since inception, NIAAP-I has generated a return of 24.5% p.a versus benchmark return of 22.8% p.a. The current exposure in Equity Fund and Income Fund stands at 80.6% & 9.6% respectively. The Plan can invest up to 95% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

Investment Objective

The objective of the Fund is to provide investors an opportunity to earn attractive return from an actively managed portfolio of Shari'ah Compliant Equity Fund and Income Fund.

Fund Manager's Commentary

NAFA launched its NAFA Islamic Active Allocation Plan-III (NIAAP-III) in June 2016 which is the third plan under NAFA Islamic Active Allocation Fund-I. The Active Allocation Plan is dynamically managed between dedicated equity related and Income schemes managed by NAFA based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-III has an initial maturity of two years.

Since inception, NIAAP-III has generated a cumulative return of 20.1% versus benchmark return of 14.2%. The current exposure in Equity Fund and Income Fund stands at 82.2% & 11.1% respectively. The Plan can invest up to 95% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

Investment Objective

To earn a reasonable rate of return along with a high degree of liquidity by investing in short-term Shari'ah compliant banks deposits and money market/debt securities.

Fund Manager Commentary

During the month under review, the Fund has generated an annualized return of 4.9% against the benchmark return of 2.4%. The performance is net of management fee and all other expenses.

The Fund aims to consistently generate better return than the profit rates offered by Islamic Banks / Islamic windows of commercial banks, while also providing easy liquidity along with a high quality credit profile. The Fund is allowed to invest in shariah compliant Government Securities of maturity up to 3 years as well as Shariah compliant money market and debt securities of up to 2 years maturity rated AA- or better.

Around 88% of net assets of the portfolio is allocated in bank deposits. The higher allocation in bank deposits is due to better yields as compared to other authorized alternative investment avenues. The weighted average time-to-maturity of the Fund is 115 days.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

The objective of the Fund is to provide investors with long term capital growth from an actively managed portfolio of Shari'ah Compliant listed equities.

Fund Manager's Commentary

NAFA launched its second open-end Islamic Equity Fund namely NAFA Islamic Active Allocation Equity Fund (NIAAEF) in January, 2016. The aim of the Fund is to provide growth to the investment of Unit holders over the long-term in approved Shariah compliant equities.

NIAAEF started off the month with an allocation of around 90% in equities, which decreased to around 89% towards the end of the month. NIAAEF outperformed the Benchmark in June as the Fund was underweight in select Oil & Gas Exploration Companies, Pharmaceuticals, Paper & Board, Food & Personal Care Products, Refinery and Oil & Gas Marketing Companies that underperformed the market and overweight in select Chemical, Cement, Textile Composite, Engineering, Pharmaceuticals, Miscellaneous, and Automobile Assembler sectors stocks which outperformed the market. During the month, the allocation was increased primarily in Cement, Chemical, Miscellaneous, Engineering, Textile Composite, and Automobile Assembler sectors, whereas it was reduced primarily in Fertilizers, Oil & Gas Exploration Companies, Oil & Gas Marketing Companies, Cable & Electrical Goods, and Pharmaceutical sectors.

Investment Objective

The objective of NAFA Islamic Energy Fund is to provide investors with long term capital growth from an actively managed portfolio of Shari'ah Compliant listed equities belonging to the Energy Sector.

Fund Manager's Commentary

NAFA launched its third open-end Islamic Equity Fund namely NAFA Islamic Energy Fund (NIEF) in April, 2016. The aim of the Fund is to provide growth to the investment of Unit holders over the long-term in approved Shariah compliant energy stocks.

NIEF started off the month with an allocation of around 94% in equities, which decreased to around 85% towards the end of the month. NIEF underperformed the Benchmark in June as the Fund was overweight in select Energy sectors stocks which underperformed the market. During the month, the allocation was decreased in Oil & Gas Marketing Companies, Oil & Gas Exploration Companies, Power Generation & Distribution Companies, and Refinery sectors.
