Clarity on External Funding is Likely to Boost Investors' Confidence in the Stock Market

Economy:

After witnessing a period of economic uncertainty during the past few quarters stemming from ballooning current account deficit and concomitantly falling foreign exchange reserves, things finally seem to be improving. The last two months current account deficit has finally seen a meaningful decline. While trade deficit during the 1QFY19 surged by 8% YoY, healthy growth in remittances has resulted in a 3% decline in the current account deficit. Going forward, we are of the view that pressure on the current account deficit will ease off as the recently enacted policy measures manifest itself, with some more steps expected in the near-term. The government redoubled its focus on boosting exports as further incentives have been parceled out such as exemption from gas and electricity tariff hikes. Recent devaluation of the rupee and slapping of import duties are expected to curtail imports in the coming months. After some initial hesitation, the government has decided to negotiate a financial program with the IMF. Besides providing immediate financial inflows, entry into the IMF program would ameliorate the credibility of Pakistan in the eyes of global financial community that paving the way for fetching flows from multilateral agencies such as the World Bank, Asian Development Bank, Islamic Development Bank, and also facilitate access to international capital markets.

The recently announced Saudi funding to the tune of US\$ 6 billion in the shape of cash deposit and oil on deferred payments for one year will support the dwindling foreign currency reserves. The Government has also requested the United Arab Emirates for a Saudi-like deferred payment facility for oil imports. Apart from the friendly countries in the Middle East, Pakistan is also looking towards its all-weather friend China in tackling the external funding crisis and is also expecting concessions on tariff lines, which will ultimately boost our exports to China.

Though materialization of funding from friendly countries will help in meeting the external financing needs for FY2019; the urgency for structural reforms and measures to further narrow the current account deficit should remain the policy priority given large debt repayment requirement in FY2020. Nonetheless, this inflow from friendly countries should help in negotiations with the IMF on less stringent terms such as currency devaluation in line with the economic fundamentals, extent of further monetary tightening, and quarterly targets on build-up of SBP's reserves. To address the chronic issues, the government has taken some necessary measures, such as raising the gas and electricity prices, and fiscal consolidation through amendments in the Federal Budget 2018-19. Acknowledging the need for further consolidation, and to ensure macroeconomic stability, the State Bank of Pakistan has also increased the Discount Rate from 6.25% to 9.0% in this calendar year.

Stock Market:

Turning to the stock market, entry into an IMF program coupled with financial assistance from friendly countries will provide much-needed breathing space to the government to implement its economic reform agenda that aims to secure inclusive and self-sustaining economic growth, which would boost investors' confidence. Historical analysis shows that the stock market may be volatile sporadically. However, over a long run, it has performed better than other asset classes, providing healthy inflation-adjusted returns, unlike bank deposits which have not even kept pace with inflation. The historical analysis, as given in the Table below depicts that equities offered the best return among all the asset classes. An investment of PKR 100 in the stock market in November 2003 would be worth PKR 1,102 by the end of October 2018. During the same period, PKR 100 investment in bank deposits would have increased to a paltry PKR 222.

15 Year Nominal Return (From November 2003 to October 2018)

From the valuation perspective, the market is trading at attractive forward Price-to-Earnings (P/E) multiple of 8.5 times and we expect a decent double-digit corporate earnings growth for FY19 & FY20. There is ample domestic liquidity on the side lines to enter the stock market awaiting policy certainty and economic direction. Further, after the necessary currency adjustment, the market would regain its appeal for foreign investors. If the new government is able to embark on structural reforms as promised, the stock market can deliver healthy returns in FY19, and beyond. All considered, we advise investors to hold / increase their positions in the stock market, keeping a long-term investment objective in mind.

Stock Market Review

The month of October can be characterized as a tale of two halves for the local bourse as the benchmark KSE 100 Index slumped by 10.3% during the first half followed by a robust 13.3% recovery during the latter half to finish the month with a gain of 1.6% from the last month's close. In the first half of the month, absence of any decisive plan for financing of large funding gap stemming from the unsustainably high current account deficit and lumpy foreign loan payments along with abysmally low FX reserves stoked anxiety in the market. However, initially, the value buying bucked the negative trend as the indiscriminate sell-off sent the market to a low of 36,663 points on October 16th and compressed the Price-to-Earnings to a bargain hunting level of 7.7 times. Later on, the announcement of Saudi financing facility to the tune of US \$ 6 billion perked up the mood of investors, fueling the ongoing rally, including a whopping one-day surge of 4.1% on October 24th, 2018. Meanwhile, the government requested the Saudi-like funding facility from the oil rich United Arab Emirates. Investors also started pinning hopes on the PM's visit to China to muster a sizable financial assistance. After some initial hesitation, the government finally decided to approach the IMF for a new financing package, realizing that besides immediate financial assistance IMF endorsement would lay foundation for securing financial flows from other global financial institutions such as the World Bank, Asian Development Bank, and Islamic Development Bank and facilitate access to the global capital markets.

Looking at the participant wise activity during the month, against the sizable net foreign selling to the tune of USD 86 million; Companies, Mutual Funds, and Insurance Companies remained large buyers, accumulating fresh position in equities to the tune of USD 33 million, USD 21 million, USD 13 million, respectively.

In terms of sectoral performance during the outgoing month, Cement, Fertilizer, Oil & Gas Exploration, Oil & Gas Marketing Companies, Power Generation & Distribution, Technology & Communication, and Textile Composite sectors out-performed the market. Among the laggards were Automobile Assemblers, Chemical, Commercial Banks, Engineering, Paper & Board, and Pharmaceutical sectors. The indiscriminate sell-off during the last couple of months through first-half of the outgoing month driven by clouded earnings outlook opened-up valuation gap that drew investors toward the Cement sector. Fertilizer sector performed better than the market on the back of better than expected earnings announcement and healthy payouts. Attractive valuations, robust earnings prospects, and being key beneficiary of currency devaluation led to the out-performance of E&P sector. Better than expected earnings announcements and improving earnings prospects driven by the fresh incentives doled out by the government resulted in the superior performance of the Textile Composite sector. Automobile Assembler sector lagged the market due to disappointing earnings reports driven by cost pressures and murky demand outlook as tax non-filers are barred from the purchase of new vehicle. Cheap valuations and a key beneficiary of interest rate hike cycle attracted investors towards the Banking sector. During the latter half of the month, investors accumulated fresh position in the beaten down Engineering sector.

Going forward, shifting developments on the domestic policy front and evolving external economic landscape may cause volatility spikes in the market sporadically. From the valuation stand point, the market is trading at a forward Price-to-Earnings multiple of 8.5 and offers a decent dividend yield of around 6%. We hold on to our prognosis that foreign money would start pouring into the market as the currency finds its equilibrium value post entry into the IMF program. Based on our estimates, corporate earnings are expected to grow at a double-digit rate for FY 2019 & 2020. We reiterate our constructive view on the market given attractive valuations; decent corporate earnings growth prospects; mitigating risks to the external account; and above all abundant local liquidity.

Money Market Review

The State Bank of Pakistan (SBP) in its bi-monthly Monetary Policy review increased the Discount Rate by 100 basis points to 9%. After recording 5.1% YoY in September 2018, inflation as measured by the CPI for the month of October 2018 clocked in at 7.0%, surpassing market estimates. The inflation trajectory is expected to remain upward owing to number of inflationary pressures including pass-through of the rise in international oil prices, second-round impact of hike in gas and electricity tariffs, increase in import tariffs, and currency devaluation. Investors' preference remained tilted towards short term government securities, foreseeing upside risks to inflation and interest rates. The FX reserves held by the SBP remained under pressure and stands at abysmally low level of USD 7.78 billion, equivalent to seven weeks of imports as of October 26th, 2018. However, we expect that receipt of pledged Saudi funding, some financial assistance from other friendly countries such as the United Arab Emirates & China would ease off pressure on the external account. That being said, structural reforms hold the key to restore durable financial stability. Based on our projections, Discount Rate is likely to peak at 10.5% by June 2019.

During the outgoing month, SBP held two T-Bill auctions with a combined target of Rs.3,950 billion against the maturity of Rs.4,254 billion. In the first T-Bill auction, an amount of Rs.2,670 billion was accepted at a cut-off yield of 8.80% for 3-month and 8.85% for 6-month tenors, respectively. In the second T-Bill auction, an amount of Rs.588 billion was accepted at the same cut-off yield of 8.80% for 3-month. In the PIB auction, bids worth Rs.7.3 billion were received for 3-year, 5-year and 10-year tenors while no bids were received for 20-year tenor. Furthermore, SBP rejected bids for floating rate PIBs in both the auctions held during the months.

We have calibrated the portfolio of our money market and income funds based on our interest rate outlook and remain alert to any developments that may influence our investment strategy.

Investment Objective

To provide stable income stream with preservation of capital by investing in AA and above rated banks and money market instruments.

Fund Manager Commentary

The Fund earned an annualized return of 7.6% during October 2018 versus the Benchmark return of 7.5%. Since its launch in February 2012, the Fund has outperformed its Benchmark by 1.5% p.a. by earning an annualized return of 7.6%. This outperformance is net of management fee and all other expenses.

Being a money market scheme, the Fund has very restrictive investment guidelines. The authorized investments of the Fund include T-Bills, Bank Deposits and Money Market instruments. Minimum eligible rating is AA, while the Fund is not allowed to invest in any security exceeding six months maturity. The weighted average time to maturity of the Fund cannot exceed 90 days. The Fund is rated AA(f) by PACRA which denotes a very strong capacity to maintain relative stability in returns and very low exposure to risks.

Weighted average time to maturity of the Fund is 60 days. We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

To minimize risk, preserve capital and generate a reasonable return along with a high degree of liquidity from a portfolio primarily constituted of bank deposits and money market instruments.

Fund Manager Commentary

The Fund earned an annualized return of 7.6% during the month versus the Benchmark return of 9.4% p.a. Since its launch in November 2009, the Fund has offered an annualized return of 8.4% against the Benchmark return of 7%, hence an outperformance of 1.4% p.a. This outperformance is net of management fee and all other expenses.

The Fund is allowed to invest in Government Securities up to a maximum maturity of 3 years and also in debt securities with rating of A and above with a maximum remaining maturity of 1 year. The Fund invests 25% of its net assets in less than 90 days T-Bills or saving accounts with banks, which further enhances liquidity profile of the Fund.

The portfolio of NSPF is invested in Treasury bills, MTS and bank deposits etc. The allocation in MTS is around 7% of net assets. The weighted average time to maturity of the entire Fund is around 15 days. Our internal guidelines permit MTS financing in only fundamentally strong companies with lower volatility. It is pertinent to mention that in this asset class the Fund provides financing at only pre-determined rates of return with no direct exposure to the stock market.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

To provide income enhancement and preservation of capital by investing in prime quality Financial Sector TFCs/Sukuks, Bank deposits and short-term money market instruments.

Fund Manager Commentary

The Fund generated an annualized return of 7.7% in the month of October 2018 versus the Benchmark return of 9.4%. Since its launch in October 2011, the Fund has generated an annualized return of 8.5% p.a. against the Benchmark return of 7.8% p.a., hence an outperformance of 0.7% p.a. This outperformance is net of management fee and all other expenses.

The Fund is unique as it invests a minimum 70% of its assets in Financial Sector (mainly banks) debt securities, instruments or deposits. Minimum entity rating of issuers of debt securities is "AA-". This minimizes credit risk and at the same time enhances liquidity of the Fund. Duration of the overall portfolio cannot be more than one year. This minimizes interest rate or pricing risk. The Fund invests 25% of its net assets in less than 90 days T-Bills or saving accounts with banks, which further enhances liquidity profile of the Fund.

Exposure in TFCs was around 18% of net assets at the end of the month with average time to maturity of 4.3 years. The TFC portfolio of the Fund is predominantly floating rate linked to KIBOR. The weighted average time-to-maturity of the Fund is 0.8 year.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

To earn a reasonable rate of return in a Shariah compliant manner by investing in Shariah compliant debt securities, money market instruments and bank deposits.

Fund Manager Commentary

During the month under review, the Fund posted an annualized return of 7.5% as compared to the Benchmark return of 2.9% thus registering an outperformance of 4.6% p.a. This outperformance is net of management fee and all other expenses.

The allocation in corporate Sukuks stood at around 17% of the net assets. Around 47% of net assets of the portfolio are allocated in bank deposits. The higher allocation in bank deposits is due to better yields as compared to other authorized alternative investment avenues.

The weighted average Yield-to-Maturity (YTM) of the Sukuk portfolio is around 9.2% p.a. and weighted average time to maturity is 2.6 years. The weighted average time to maturity of the Fund is 0.7 year.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

To seek maximum possible preservation of capital and a reasonable rate of return via investing primarily in money market & debt securities having good credit rating and liquidity.

Fund Manager Commentary

The Fund posted an annualized return of 7.1% in October 2018 as compared to the Benchmark return of 9.4%. The reported return is net of management fee and all other expenses.

The weighted average time to maturity of the Fund is around 1.5 years. The Fund's sector allocation is fairly diversified with exposure to Banking, Financial Services, Fertilizer and Cement sectors. TFC portfolio of the Fund is predominantly floating rate linked to KIBOR. However, since TFCs prices may go up or down, therefore, only investors with medium-term investment horizon are advised to invest in this Fund.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

To earn a competitive rate of return while preserving capital to the extent possible by investing in liquid assets.

Fund Manager Commentary

The Fund posted an annualized return of 10.4% during October 2018 versus the Benchmark return of 9.4%. The reported return is net of management fee and all other expenses.

As the allocation of the Fund shows, exposure in TFCs and Sukuks stands at around 11% of net assets. All TFCs in the Fund are floating rate instruments linked to KIBOR.

The weighted average time to maturity of the Fund is around 0.4 year. Potential recovery in fully provided TFCs (Face Value of around Rs. 306 million), is potential upside for the Fund. Thus, the Fund is expected to perform well over the medium to long term horizon. However, since TFCs prices may go up or down, therefore, only investors with medium term investment horizon are advised to invest in this Fund.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

The objective of the Fund is to provide investors an opportunity to earn attractive return from an actively managed portfolio of Shari'ah Compliant Equity Fund and Income Fund.

Fund Manager's Commentary

NBP Funds launched its NAFA Islamic Active Allocation Plan-I (NIAAP-I) in January, 2016 which is the first plan under NAFA Islamic Active Allocation Fund-I. The Active Allocation Plan is dynamically managed between dedicated equity related and income schemes managed by NBP Funds based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-I has an initial maturity of two years.

Since inception, NIAAP-I has generated a return of 7.8% p.a versus Benchmark return of 8.1% p.a. The current exposure in Income Fund and Equity Fund stands at 53.4% & 38.0%, respectively. The Plan can invest up to 100% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

Fund Manager's Commentary

NBP Funds launched its NAFA Islamic Active Allocation Plan-VI (NIAAP-VI) in May, 2017 which is the first plan under NAFA Islamic Active Allocation Fund-II. The Active Allocation Plan is dynamically managed between dedicated equity related and income schemes managed by NBP Funds based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-VI has an initial maturity of two years.

Since inception, unit price of NIAAP-VI has decreased by 8.1% p.a versus the Benchmark decline of 7.2% p.a. The current exposure in Income Fund and Equity Fund stands at 56.0% & 38.9%, respectively. The Plan can invest up to 100% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

Investment Objective

To earn a reasonable rate of return along with a high degree of liquidity by investing in short-term Shari'ah Compliant bank deposits and money market/debt securities.

Fund Manager Commentary

During the month, the Fund has generated an annualized return of 7.2% against the benchmark return of 2.9%. The performance is net of management fee and all other expenses.

The Fund aims to consistently generate better return than the profit rates offered by Islamic Banks / Islamic windows of commercial banks, while also providing easy liquidity along with a high quality credit profile. The Fund is allowed to invest in Shariah Compliant Government Securities of maturity up to 3 years as well as Shariah Compliant money market and debt securities of up to 2 years maturity rated AA- or better.

Around 69% of net assets of the portfolio are allocated in bank deposits. The higher allocation in bank deposits is due to better yields as compared to other authorized alternative investment avenues. The weighted average time-to-maturity of the Fund is 46 days.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

The objective of the Fund is to provide investors with long term capital growth from an actively managed portfolio of Shari'ah Compliant listed equities.

Fund Manager's Commentary

NBP Funds launched its second open-end Islamic Equity Fund namely NAFA Islamic Active Allocation Equity Fund (NIAAEF) in January, 2016. The aim of the Fund is to provide growth to the investment of unit holders over the long-term in approved Shariah Compliant equities.

NIAAEF started off the month with an allocation of around 82% in equities, which increased to around 86% towards the end of the month. NIAAEF outperformed the Benchmark in October as the Fund was underweight in select Cement, Oil & Gas Exploration Companies, Automobile Assembler, Paper & Board, and Pharmaceuticals sectors stocks which underperformed the market and overweight in select Chemical, Cement, Commercial Banks, and Oil & Gas Marketing Companies sectors stocks which outperformed the market. During the month, the allocation was increased primarily in Fertilizer, Power Generation & Distribution Companies, Oil & Gas Marketing Companies, and Textile Composite sectors, whereas it was reduced primarily in Oil & Gas Exploration Companies, Chemical, and Technology & Communication sectors.
