Is it time to exit the stock market?

The benchmark KSE 100 Index is down by 22% from its peak levels hit on May 24th, 2017. We attribute this lackluster performance of the stock market to the rising noise in the domestic politics, deteriorating Balance of Payment (BoP) position, and a tough stance towards Pakistan by the US in its Afghan policy. Lack of widely anticipated net foreign inflows after the reclassification of PSX into MSCI EM Index with effect from June 2017 also dampened local investors' sentiments.

We are seeing a focus of the incumbent Prime Minister towards the issues facing the economy, especially deteriorating external account position. We are hearing about some concrete measures to be taken to ameliorate the situation, including: (i) devaluation of the currency to partially restore exports competitiveness, and restrict imports; (ii) tariff imposition to curtail non-essential imports; and (iii) an incentive package to revive faltering exports. Amid abundant global liquidity and sufficient borrowing capacity, the government also plans to raise USD 4-5 billion from the international capital market during the fiscal year.

After declining by about 22% from its recent peak, the stock market valuations have become attractive, with the PSX trading at a Price to Earnings ratio of about 8.5 times. By comparison, Asian stock markets, on average are trading at a Price-to-Earnings ratio of 15.5 times. Corporate earnings are expected to rise by 12% in FY18, and economy is expected to again grow by 5%. Inflation and interest rates are expected to rise marginally by about 1% in FY18.

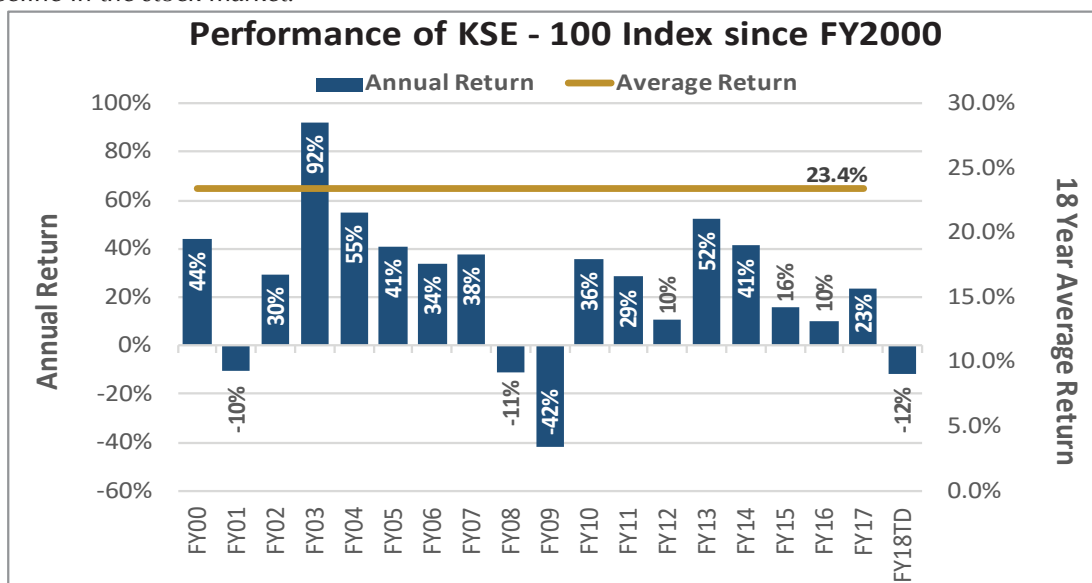

Stock Market Historical PE
Stock Markets seems attractively Priced

Regional PE comparison
Pakistan is the most under-valued Market

Based on the above analysis, we advise our investors to gradually build position in the stock market, and resist the temptation of panic selling at these levels. We believe that over a one year period the upside potential of the stock market is much more than the downside risk. We would like to highlight that despite being volatile, the stock market has given an average return of 23.4% per annum since 2000 due to robust corporate earnings growth and decent dividend payout. History indicates that those investors who are patient, and do not sell in panic, end up doing very well (see chart below). We advise our investors to be patient. In fact, we advise investors to start investing gradually in the stock funds, considering the attractive valuations following about 22% decline in the stock market.

August 2017

Stock Market Review

August-17 remained a tormenting month for the local equities as the KMI-30 index slipped by a sizeable 11.9% during the month. While the market was tossed and turned by the Panama Case verdict last month, acceding to the apex court decision was a major positive and appointment of a new Prime Minister was another step in the right direction. Though we witnessed initial bouts of recovery in the beginning of the month, the political temperature again started to rise as the ousted Prime Minister announced a rally from Islamabad to Lahore via GT Road. The Ex-PM publically criticized the court verdict, and termed it as a conspiracy hinting towards a probable head-on collision with multiple state institutions, which again unnerved the investors and weighed on the market. Foreigners again remained net sellers during the month while major buying came from Companies and Banks/DFI's. The economic numbers, mainly external account, was not encouraging either as the current account deficit clocked in at USD2.1 billion (one of the highest in recent years) further dampening the market sentiment and reinforced the idea of PKR depreciation against USD amid tumbling forex reserves which have declined by over USD 4.0 billion from its peak. The much awaited new Afghan Policy outlined by US President Donald Trump portends abrasive mutual relations with Washington veering in between both criticism and praise of Pakistani efforts to curb extremists.

During the month, Power Generation & Distribution, Oil & Gas Marketing, Textiles, Food & Personal care, Technology and Insurance sectors outperformed the market while Cement, Pharmaceuticals, Chemical, Paper & Board, Automobile Assemblers and Cable & Electric sectors lagged behind. Cash dividend payout by most of the IPPs announced in the outgoing month along with allure of US Dollar based return formula led to sector outperforming the market. Similarly Textile sector also performed better than the market due to growing expectation of either devaluation in the coming quarters or improvement in the export package announced earlier. Oil & Gas Marketing sector also outperformed the market as the sector heavy weight PSO outperformed considerably due to announcement of decent results accompanied by bonus dividend and also unveiling of its plans regarding expansion in refinery business. Among the key underperforming sectors, Cement sector saw renewed concerns on pricing discipline even though volumetric sales continue to remain strong. Pharmaceutical sector also underperformed due to lower than expected financial results and market adjusting down the high multiple sectors. A key event during the last week of the outgoing month was announcement of index heavy weight Habib Bank Ltd receiving notice from the US regulator of a hefty penalty which the Bank plans to contest pertaining to its New York branch. Nonetheless, this further dampened the investor sentiment especially foreigners and the stock has witnessed a sizeable downturn from its recent high.

While we acknowledge that the economic and political risks have increased, the concerns lately have been centering on speculation about all the bad things that can happen. In our view, in the context of low interest rates, and accelerating and stable growth, stocks offer the most attractive valuations among the key asset classes. After declining by about 22% from its peak, the stock market valuations have become attractive, trading at a Price to Earnings ratio of about 8.5 times. Corporate earnings are expected to rise by 12% in FY18, and economy is again expected to grow in the vicinity of 5% plus. We advise our investors to gradually build position in the stock market.

Money Market Review

After recording 2.91% YoY in July 2017, inflation as measured by the CPI for August 2017 clocked in at 3.41%. The investment appetite of commercial banks and financial institutions; based on the current market affairs and political noise kept the investment focus towards short-term securities; moderating the investment risks. The State Bank of Pakistan (SBP) through the open market operations managed the weighted average overnight repo rate close to the policy rate. The foreign exchange reserves during the month were recorded at USD 20.0 billion against USD 20.2 billion in the previous month.

During the month of August, SBP held three T-Bill auctions with a combined target of Rs. 1,550 billion against a maturity of Rs. 1,440 billion. In the first T-Bill auction, an amount of Rs. 734 billion was realized against the target of Rs. 650 billion and maturity of Rs. 637 billion at a cut-off yield of 5.99%, 6.01% and 6.04% for 03, 06 and 12 months tenor respectively. The bid pattern was skewed towards 03 months relative to 06 and 12 months tenor. In the second T-Bill auction, Ministry of Finance (MoF) realized Rs. 616 billion against the target of Rs. 600 billion and maturity of Rs. 534 billion. Cut-off yields for 03 and 06 months tenor were maintained while the bids for 12 month were rejected. The bid pattern remained skewed towards 03 months as compared to 06 months tenor. While, in the third T-Bill auction, MoF realized Rs. 521 billion against the target of Rs. 300 billion and maturity of Rs. 269 billion. Cut-off yields for 03 and 06 months tenor were maintained. The bid pattern remained skewed towards 03 months as compared to 06 and 12 months tenor. In the PIB auction, MoF received collective bids worth Rs. 26 billion for 03, 05 and 10 years while no bids were received in 20 years tenor. However, the auction was rejected against the target of Rs. 100 billion and maturity of Rs. 36 billion. We have adjusted the portfolio of our money market and income funds based on the capital market expectations and are closely monitoring the developments in the capital markets and will rebalance the portfolio accordingly.

Investment Objective

To provide preservation of capital and earn a reasonable rate of return along with a high degree of liquidity by investing in short-term Shariah compliant banks and money market / debt securities.

Fund Manager Commentary

The Fund generated an annualized return of 4.8% for the month of August 2017 versus the Benchmark return of 2.3% thus registering an outperformance of 2.5% p.a. The reported return is net of management fee and all other expenses.

The Fund aims to consistently provide better return than the profit rates offered by Islamic Banks / Islamic windows of commercial banks, while also providing easy liquidity along with a high quality credit profile. The Fund is allowed to invest in short-term Shariah compliant money market securities of up to six months maturity rated AA- or better. The Fund is not authorized to invest in corporate debt securities and Equities.

The allocation of the Fund in GOP Ijarah Sukuks is around 3.5% of net assets, which are floating rate instruments with 6-months coupon re-setting. Around 96% of net assets of the portfolio are invested in bank deposits which enhance the liquidity profile of the Fund. The weighted average time to maturity of the fund is 17 days.

We will rebalance the allocation of the fund proactively based on the capital market outlook.

Investment Objective

To earn a reasonable rate of return in a Shariah compliant manner by investing in Shariah compliant debt securities, money market instruments and bank deposits.

Fund Manager Commentary

During the month under review, the Fund posted an annualized return of 4.6% as compared to the Benchmark return of 2.3% thus registering an outperformance of 2.3% p.a. This outperformance net of management fee and all other expenses.

The allocation in corporate Sukuks stood at around 3.7% of the net assets. Around 80% of net assets of the portfolio is allocated in bank deposits. The higher allocation in bank deposits is due to better yields as compared to other authorized alternative investment avenues.

The weighted average Yield-to-Maturity (YTM) of the Sukuk portfolio is around 5.6% p.a. and weighted average time to maturity is 4.1 years. The weighted average time to maturity of the Fund is 202 days.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

The objective of NAFA Islamic Principal Preservation Fund is to earn a potentially high return through dynamic asset allocation between Shariah compliant equity related, and Shariah compliant income/ money market Collective Investment Schemes, while providing principal preservation.

Fund Manager's Commentary

Since inception, NIPPF has generated a return of 8.8% p.a versus benchmark return of 7.3% p.a. The current exposure in equity/asset allocation funds stands at 12.2%. During the month, maximum multiplier stood a 0.5 whereas minimum multiplier was 0.4. In line with directive no 18 of 2016, effective from 1st January 2017, the equity exposure of the Fund is capped at 10%. Consequently, going forward, your Fund may not be able to offer attractive returns due to very low exposure in the stock market.

Fund Manager's Commentary

NAFA launched its NAFA Islamic Active Allocation Plan-I (NIAAP-I) in January, 2016 which is the first plan under NAFA Islamic Active Allocation Fund-I. The Active Allocation Plan is dynamically managed between dedicated equity related and Income schemes managed by NAFA based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-I has an initial maturity of two years.

Since inception, NIAAP-I has generated a return of 15.3% p.a versus benchmark return of 14.1% p.a. The current exposure in Equity Fund and Income Fund stands at 65.9% & 24.7%, respectively. The Plan can invest up to 95% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

Investment Objective

The objective of the Fund is to provide investors an opportunity to earn attractive return from an actively managed portfolio of Shari'ah Compliant Equity Fund and Income Fund.

Fund Manager's Commentary

NAFA launched its NAFA Islamic Active Allocation Plan-VII (NIAAP-VII) in June, 2017 which is the second plan under NAFA Islamic Active Allocation Fund-II. The Active Allocation Plan will be dynamically managed between dedicated equity related and Income schemes managed by NAFA based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-VII has an initial maturity of two years.

Since inception, unit price of NIAAP-VII has decreased by 6.0% versus the Benchmark decline of 6.6%. The current exposure in Equity Fund and Income Fund stands at 51.1% & 39.8%, respectively. The Plan can invest up to 95% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

Investment Objective

To earn a reasonable rate of return along with a high degree of liquidity by investing in short-term Shari'ah compliant banks deposits and money market/debt securities.

Fund Manager Commentary

During the month under review, the Fund has generated an annualized return of 3.7% against the benchmark return of 2.3%. The performance is net of management fee and all other expenses.

The Fund aims to consistently generate better return than the profit rates offered by Islamic Banks / Islamic windows of commercial banks, while also providing easy liquidity along with a high quality credit profile. The Fund is allowed to invest in shariah compliant Government Securities of maturity up to 3 years as well as shariah compliant money market and debt securities of up to 2 years maturity rated AA- or better.

Around 92% of net assets of the portfolio is allocated in bank deposits. The higher allocation in bank deposits is due to better yields as compared to other authorized alternative investment avenues. The weighted average time-to-maturity of the Fund is 78 days.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

The objective of the Fund is to provide investors with long term capital growth from an actively managed portfolio of Shar'i'ah Compliant listed equities.

Fund Manager's Commentary

NAFA launched its second open-end Islamic Equity Fund namely NAFA Islamic Active Allocation Equity Fund (NIAAEF) in January, 2016. The aim of the Fund is to provide growth to the investment of Unit holders over the long-term in approved Shariah compliant equities.

NIAAEF started off the month with an allocation of around 86% in equities, which increased to around 87% towards the end of the month. NIAAEF outperformed the Benchmark in August as the Fund was underweight in select Cement, Pharmaceuticals, Cable & Electric Goods, and Food & Personal Care Products sectors stocks that underperformed the market and overweight in select Power Generation & Distribution Companies, Technology & Communication, Miscellaneous, Engineering, and Automobile Assembler sectors stocks which outperformed the market. During the month, the allocation was increased primarily in Oil & Gas Exploration Companies, Oil & Gas Marketing Companies, miscellaneous, Textile Composite, and Engineering Sectors, whereas it was reduced primarily in Fertilizer, Food & Personal Care Products, Power Generation & Distribution Companies, Pharmaceuticals, Cable & Electrical Goods, Chemical, and Cement sectors.
