Pakistan's Economic & Capital Market Outlook

Economy:

The newly elected federal government led by Pakistan Tehreek-e-Insaf seems well placed to implement its economic reforms agenda that aims to put the economy on a self-sustaining growth path. After witnessing 5.8% GDP growth during the last year, real GDP growth is likely to slow down in FY19 to around 4.4% p.a. as the government aims to contain the alarming deficits. The external side has come under severe pressure with Current Account Deficit (CAD) rising by 44% in FY18 to USD 18.1 billion (5.8% of GDP), while the fiscal deficit swelled to unsustainably high level of 6.6% of GDP. Financing of large and rising fiscal and current account deficits has led to accumulation of debt, reaching 87% of GDP in FY18 compared to 72% in FY14. Consequently, debt servicing along with defense spending is devouring a lion's share of the revenue, leaving little for development spending.

In response to the SBP's declining foreign exchange reserves, various policy measures have been enacted of late such as monetary policy tightening, PKR devaluation, exports incentive package, and hikes in import duties. However, rise in global oil prices have kept imports sticky. With import cover falling to a mere 8 weeks as of July-18, there is a paramount need to take further steps to address the external account and fiscal account imbalances.

The new government has decided to wait till September-end, and is mulling over options other than the IMF for bridging the external account gap. However, we reckon that a new IMF program is ineludible. Besides providing immediate relief to the dwindling FX reserves, entry into an IMF program is likely to enhance the credibility of Pakistan in the eyes of other multilateral agencies and pave the way for access to international capital markets. IMF is expected to impose strict conditions such as rise in energy prices and interest rates, no fresh borrowing from SBP, and further devaluation of the rupee. These conditions are expected to rein in aggregate demand pressure and contain the twin deficits. These policy measures are expected to be followed up with critical structural reforms such as broadening the tax base, eradicating corruption, improving governance, restructuring or privatization of Public Sector Enterprises (PSEs), making our local industries and exports competitive, and decreasing the transmission and distribution losses in the energy chain. As we see it, initially, these policy measures could lead to slower economic growth; higher inflation and interest rates; and tighter financial condition. However, if undertaken successfully, these policy actions would lend medium-term economic sustainability and faster economic growth.

Capital Markets:

For the corporate sector, the upcoming challenging economic backdrop shaped by possible economic slowdown and rising cost of doing business can impact profitability as it may not be able to immediately pass on the hike in input cost. Thus, some sectors may not fare well in the short-term, however in the medium term, due to gradual rise in demand, the corporate sector is expected to see improvement in profits. We would like to highlight that currency devaluation by and large is positive for the stock market as profitability of the major listed sectors such as Oil & Gas Exploration, Textiles, IPPs, Banks and Technology tends to improve with devaluation. On the other hand, smaller sectors such as Cement, Steel, Autos & Pharmaceuticals, etc. that rely on imported raw material can potentially witness some margin compression, at least in the short term.

While acknowledging the risks to the economy, we reiterate our view that the stock market is well poised to deliver a healthy return during FY2018-19 given reasonable valuations as captured in the forward Price-to-Earnings (P/E) multiple of 8.7 times, and decent double-digit corporate earnings growth in FY19 & FY20. If the new government is able to embark on the structural reform as promised, the market can potentially witness a rerating in our view.

In this time period of rising interest rates, Fixed Income and Money Market funds have started offering attractive returns to the investors. Common savers are generally not aware of these lucrative investment avenues that are offering superior returns along with ease of encashment.

Stock Market Review

During August 2018, the benchmark KMI-30 Index fell by 1,524 points (2.1%) to finish the month at 70,817 points. After clinching victory in the general election, PTI Chairman, Mr. Imran Khan took oath as 22nd Premier of the country on August 18th, meanwhile the process of formation of provincial governments also completed smoothly that put to rest uncertainty in the domestic politics. However, as the post-election euphoria fizzled out, the market participants opted to stay on the sidelines anxiously awaiting a comprehensive economic plan from the newly elected PTI-led government to address the multi-faced challenges facing economy. During the last week of the month, Finance Minister Mr. Asad Umer told the Senate that the country requires USD 9 billion in the short-term. He further added that the loan will be taken after taking the Parliament on board and a plan to this effect will be finalized in next one or two weeks. Adding to the investors' woes was ongoing corporate results season with un-impressive showings, failing to provide any positive trigger to the market. Moreover, market sentiments were also dented by turmoil in the EM countries reliant on the USD to fund economic growth and large current account deficits such as Turkey and Argentina, suffering sharp fall in currencies and sell-off in equities. Investors are also wary of FATF upcoming quarterly review meeting to be held in Jakarta on 11-12 September. It may be recalled that in the previous review, 27 deficiencies were identified in the three broad categories, namely currency smuggling, Havala/Hundi businesses, and potential terror financing of proscribed organizations.

During the month, Foreign Investors remained the largest sellers in the market off-loading position worth USD 67.4 million. On the contrary, Insurance Companies, Individuals, and Other Organizations stood as large buyers, accumulating fresh position to the tune of USD 36.8 million, USD 26.7 million, and USD 10.8 million, respectively.

During the month, Automobile Assembler, Chemical, Glass & Ceramics, Oil & Gas Marketing Companies, Oil & Gas Exploration, Technology & Communication, and Textile Composite sectors performed better than the market while Commercial Banks, Engineering, Pharmaceuticals, Power Generation & Distribution, and Refinery sectors trailed the broader market. Led by Indus Motor Company owing to impressive profit announcement, the Automobile Assembler sector managed to out-perform the market. Improving earnings outlook drew investors towards the Chemical sector. Reasonable valuations and being a potential beneficiary of government import substitution policy revived investors' interest in the Glass & Ceramics sector. Healthy payouts and expectations of resolution of chronic circular debt issue resulted in the out-performance of OMC sector. Expectation of further incentives for export sectors and robust earnings growth led to the strong performance of Technology & Communication sector. Despite improving fundamentals and attractive valuations, the Banking sector lagged the market amid large foreign selling. Risks to earnings in the wake of potential economic slowdown led to the subdued performance of Engineering sector. Rising interest rates, negative news flow, and potential threat of shutdown of FO based power plants during the upcoming winter season resulted in the lagged performance of Power sector.

What lies ahead for the stock market? In our view, the market will take cue from the economic policy framework of the government and its implications for the corporate profitability. As we see it, initially, these policy measures could lead to slower economic growth; large currency devaluation; higher inflation and interest rates; and tighter financial condition. However, if undertaken successfully, these policy actions would lend medium-term economic sustainability and faster economic growth that bodes well for the stock market. In view of the foregoing, we stick to our thesis that after some hiccups in the short-term the stock market is well poised to deliver a healthy double-digit return for FY 2018-19.

Money Market Review

Inflation as measured by the CPI for the month of August 2018 clocked in at 5.8%. We expect upward trajectory of inflation owing to large fiscal borrowing by the government, some further currency devaluation, and increasing import tariffs. During the month, short-term sovereign yields slightly inch up after pricing in 100bps hike in the policy rate in the last monetary policy review in July 2018. As witnessed in the recent T-Bills auctions, investors' preference remained tilted towards short term government securities, foreseeing further upside risks to inflation and interest rates. Amid foreign commercial borrowing, total liquid FX reserves exhibited stability, which stood at USD 16.7 billion as of 24th August.

During the outgoing month, SBP held three T-Bill auctions with a combined target of Rs. 2,000 billion against the maturity of Rs. 1,862 billion. In the first T-Bill auction, an amount of Rs. 934 billion was accepted at a cut-off yield of 7.75% for 3-month tenor; while no bids were received in 6-month and 12-month tenors. In the second T-Bill auction, an amount of Rs. 48 billion was accepted wherein cut-off yield was maintained at 7.75% for 3-month tenor. Again, no bids were received in 6-month and 12-month tenors. In the third T-Bill auction, an amount of around Rs. 50 billion was accepted at the same cut-off yield of 7.75% for 3-month tenor and once again, no bids were received in other tenors. In the PIB auction, an amount of Rs. 15.9 billion was realized at a cut-off yield of 9.25% for 5-year tenor. In the floating rate PIB auction, SBP attracted bids worth Rs. 151.5 billion wherein an amount of Rs. 101.5 billion was realized at a cut-off margin of 70 basis points over the benchmark (i.e. weighted average yield of the 06-month Market Treasury Bills of 7.85%).

We have calibrated the portfolio of our money market and income funds based on our interest rate outlook and remain alert to any developments that may influence our investment strategy.

Investment Objective

To provide preservation of capital and earn a reasonable rate of return along with a high degree of liquidity by investing in short-term Shariah Compliant banks and money market / debt securities.

Fund Manager Commentary

The Fund generated an annualized return of 6.8% for the month of August 2018 versus the Benchmark return of 2.7% thus registering an outperformance of 4.1% p.a. This reported return is net of management fee and all other expenses.

The Fund aims to consistently provide better return than the profit rates offered by Islamic Banks / Islamic windows of commercial banks, while also providing easy liquidity along with a high quality credit profile. The Fund is allowed to invest in short-term Shariah Compliant money market securities of up to six months maturity rated AA- or better. The Fund is not authorized to invest in corporate debt securities and Equities.

The allocation of the Fund in GOP Ijarah Sukuks is around 2.3% of net assets. Around 79% of net assets of the portfolio are invested in bank deposits which enhance the liquidity profile of the Fund. The weighted average time to maturity of the Fund is 34 days.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

The objective of the Fund is to provide investors an opportunity to earn attractive return from an actively managed portfolio of Shari'ah Compliant Equity Fund and Income Fund.

Fund Manager's Commentary

NBP Funds launched its NAFA Islamic Active Allocation Plan-I (NIAAP-I) in January, 2016 which is the first plan under NAFA Islamic Active Allocation Fund-I. The Active Allocation Plan is dynamically managed between dedicated equity related and income schemes managed by NBP Funds based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-I has an initial maturity of two years.

Since inception, NIAAP-I has generated a return of 7.4% p.a versus Benchmark return of 8.1% p.a. The current exposure in Income Fund and Equity Fund stands at 59.5% & 31.2%, respectively. The Plan can invest up to 100% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

Investment Objective

The objective of the Fund is to provide investors an opportunity to earn attractive return from an actively managed portfolio of Shari'ah Compliant Equity Fund and Income Fund.

Fund Manager's Commentary

NBP Funds launched its NAFA Islamic Active Allocation Plan-VII (NIAAP-VII) in June, 2017 which is the second plan under NAFA Islamic Active Allocation Fund-II. The Active Allocation Plan is dynamically managed between dedicated equity related and income schemes managed by NBP Funds based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-VII has an initial maturity of two years.

Since inception, unit price of NIAAP-VII has decreased by 5.9% p.a versus the Benchmark decline of 3.5% p.a. The current exposure in Income Fund and Equity Fund stands at 60.8% & 30.7%, respectively. The Plan can invest up to 100% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

Fund Manager's Commentary

NBP Funds launched its NAFA Islamic Active Allocation Plan-VIII (NIAAP-VIII) in November, 2017 which is the third plan under NAFA Islamic Active Allocation Fund-II. The Active Allocation Plan is dynamically managed between dedicated equity related and income schemes managed by NBP Funds based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-VIII has an initial maturity of two years.

Since inception, unit price of NIAAP-VIII has decreased by 0.04% versus the Benchmark increase of 1.0%. The current exposure in Income Fund and Equity Fund stands at 61.3% & 31.0%, respectively. The Plan can invest up to 100% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

Investment Objective

The objective of NAFA Islamic Capital Preservation Plan-I is to earn a potentially high return through dynamic asset allocation between Shariah Compliant Dedicated Equity and Money Market based Collective Investment Schemes, while providing Capital Preservation of the Initial Investment Value including sales load at completion of twenty four months and beyond.

Fund Manager's Commentary

NBP Funds launched its NAFA Islamic Capital Preservation Plan-I (NICPP-I) in February, 2018 which is the fourth plan under NAFA Islamic Active Allocation Fund-II. The Plan is dynamically allocated between the Equity Component and Money Market Component by using the Constant Proportion Portfolio Insurance (CPPI) Methodology. Allocation to Equity Component is generally increased when equity market is rising, while allocation to the Money Market Component is generally increased when the equity market declines. The Plan is presently closed for new subscription. NICPP-I has an initial maturity of two years.

Since inception, unit price of NICPP-I has increased by 1.2% versus the benchmark increase of 0.7%. The current exposure in Money Market Fund and Equity Fund stands at 89.6% & 9.4%, respectively. During the month, maximum multiplier stood a 1.4 whereas minimum multiplier was 1.3.

Investment Objective

To earn a reasonable rate of return along with a high degree of liquidity by investing in short-term Shari'ah Compliant bank deposits and money market/debt securities.

Fund Manager Commentary

During the month, the Fund has generated an annualized return of 5.8% against the benchmark return of 2.7%. The performance is net of management fee and all other expenses.

The Fund aims to consistently generate better return than the profit rates offered by Islamic Banks / Islamic windows of commercial banks, while also providing easy liquidity along with a high quality credit profile. The Fund is allowed to invest in Shariah Compliant Government Securities of maturity up to 3 years as well as Shariah Compliant money market and debt securities of up to 2 years maturity rated AA- or better.

Around 89% of net assets of the portfolio are allocated in bank deposits. The higher allocation in bank deposits is due to better yields as compared to other authorized alternative investment avenues. The weighted average time-to-maturity of the Fund is 38 days.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

The objective of the Fund is to provide investors with long term capital growth from an actively managed portfolio of Shari'ah Compliant listed equities.

Fund Manager's Commentary

NBP Funds launched its second open-end Islamic Equity Fund namely NAFA Islamic Active Allocation Equity Fund (NIAAEF) in January, 2016. The aim of the Fund is to provide growth to the investment of unit holders over the long-term in approved Shariah Compliant equities.

NIAAEF started off the month with an allocation of around 76% in equities, which increased to around 80% towards the end of the month. NIAAEF outperformed the Benchmark in August as the Fund was underweight in select Power Generation & Distribution Companies, Pharmaceuticals, Refinery, and Automobile Assembler sectors stocks which underperformed the market and overweight in select Technology & Communication, Oil & Gas Marketing Companies, Paper & Board, and Commercial Banks sectors stocks which outperformed the market. During the month, the allocation was increased primarily in Chemical, Cable & Electric Goods, Oil & Gas Exploration Companies, Oil & Gas Marketing Companies, and Power Generation & Distribution Companies sectors, whereas it was reduced primarily in Cement, Fertilizer, and Technology & Communication sectors.
