Historical Performance of Asset Classes

Long term results from history may provide useful insights on future probable outcomes. Recognizing this principle, we have examined the historical performance of key domestic investment classes for a 15-year period from January 2001 to December 2015. We have included six categories for which long-term data is available, comprising of five major asset classes i.e. Treasury Bills, Bank Deposits, National Savings Schemes (NSS), Pakistan Investment Bonds (PIBs) and Equities. We have also added a synthetic asset class Capital Protected Strategy (CPS) in our analysis. Under the Capital Protected Strategy (CPS), portfolio is dynamically managed between low risk and high risk component with the objective of protection of initial investment amount, while also providing some upside growth of the stock market. However, the results from this strategy are based on back-testing and not actual results as this strategy was not practiced during this entire period. During this 15-year period, headline inflation (CPI) has averaged 8.3% per annum, and Pak Rupee has depreciated against USD by 4.02% per year, on average.

The historical analysis, as given in the table below, shows that equities offered the best nominal and real return among all asset classes in our study. A PKR 100 investment in equities in 2001 would be worth PKR 2,177 by 2015 end. During the same period, a PKR 100 investment in bank deposits or T-bills would have increased to just PKR 235 and PKR 371, respectively.

Performance of asset classes from January 2001 to December 2015

Asset class	Bank Deposit***	T-bill	Special Savings Certificates (SSC)	Pakistan Investment Bonds (PIB)	Capital Protected Strategy (CPS)	Equity
Nominal annualized return	5.9%	9.1%	10.3%	13.5%	14.0%	22.8%
Inflation	8.3%	8.3%	8.3%	8.3%	8.3%	8.3%
Real return (adjusted for inflation)	-2.2%	0.8%	1.9%	4.8%	5.3%	13.4%
Annualized Standard Deviation (Risk)	0.6%	1.2%	6.7%	13.6%	8.1%	26.5%
Sharpe Ratio*	N/A**	N/A	0.18	0.32	0.61	0.52
Future Value of Rs. 100 at the end of 15 years - Nominal value	235	371	436	666	717	2,177
Future Value of Rs. 100 at the end of 15 years - Real value (adjusted for inflation)	71	113	133	203	218	662

Value of Rs. 100 at the end of 15 years – Nominal

The historical analysis of these asset classes supports the basic notion that there is a positive relationship between risk and return. As expected, equities have the highest volatility or risk, and bank deposits and T-bills have the lowest risk. Our analysis shows that for investors with long-term investment horizon, equities offer the highest return. However, over the long-term, Capital Protected Strategy (CPS) offered the best risk-adjusted return as measured by the Sharpe Ratio during the 15-year period. More specifically, CPS delivered an attractive nominal return of about 14.0% per annum with a relatively low risk level (standard deviation of 8.1%).

January 2016

Stock Market Review

Against the widespread belief of bullish January effect, local equities struggled, dragged down by Oil & Gas sector on plunging global oil prices, divergent policy moves by the central banks in the developed economies, and rising headlines on the weakening global growth prospects. However, in the last week, equities pared back some losses led by Oil & Gas sector amid partial recovery in global oil prices. Nonetheless, the benchmark KMI-30 index declined by 3.2% during the month to close at 53,835 level. The sell-off in equities during January was global and in lockstep with oil prices where many markets entered the bear market range amid stretched valuations, corporate earnings slowdown, tightening financial conditions, and concerns on the global economic growth. Low oil prices provide multifaceted benefits to our economy that depends on imports for around three-fourth of its oil demand. Inflation remains at multi-year low, current account deficit has reached a manageable level amid low oil import bill, fiscal deficit is expected to remain contained helped by low subsidy burden and interest rates have declined to single digits primarily due to anchored inflation expectation. On the contrary, foreign selling remained unabated during the month with net outflows recorded at US \$ 50 million. Moreover, tragic terrorist attack on a university in KPK province further added to the investors' angst.

During January 2016, Automobiles Assemblers, Cement, Engineering, Fertilizer, Pharmaceuticals, Power Generation & Distribution sectors performed better than the market, while Oil & Gas Exploration, Banking, Paper & Board, and Textile Composite sectors lagged behind. Automobile sector took a breather after posting a strong performance during last year. Cement sector led the pack and posted robust performance amid healthy domestic dispatches and steady profit margins. During better part of the month, a sizable sell-off was witnessed in Oil & Gas Exploration sector amid renewed collapse in global oil prices with partial recovery towards the end of the month. Paltry yield on the alternative fixed income avenues resulted in the superior performance of Power Generation & Distribution sector. Banking stocks continued to remain under pressure amid drag on earnings from lower interest rates as well as some adverse taxation measures announced in the budget.

Going forward, we maintain our positive outlook on the stock market driven by relatively attractive valuations as captured in 8 times PE multiple; benign near-term inflation and interest rate outlook; comfortable external account position; and improving macroeconomic prospects. We believe the stock market is well poised to deliver a healthy double digit return in CY16 driven by around 6% dividend yield and probable rerating of the market amid improving economic indicators. However, we also acknowledge that these returns may be accompanied by volatility bouts amid uncertainty on global monetary policy front, fears of a sharp slowdown in some major emerging economies and rising geopolitical risks in war ravaged Middle East. To navigate in this tumultuous investment landscape, we recommend investors to keep a long-term perspective and ignore the scary headlines about the economy and markets.

Money Market Review

During January, yield curve responded to rising market expectations of a policy rate cut by SBP and excessive liquidity in the market. More specifically, yield on PIBs came down by 50 bps in 3 and 5 years tenor whereas 25 bps decline was seen in 10 years. Similarly, T-Bills yield declined by 20-25 bps. However, State Bank of Pakistan (SBP) in its bi-monthly Monetary Policy Review maintained the discount rate at 6.5%. As per SBP, the main reason behind this policy decision is likely gradual reversal of declining trend in inflation. Inflation as measured by CPI for January 2016 clocked in at 3.3% on a year-on-year basis as compared to last month reading of 3.2%.

In the two T-Bills auctions during the month, MoF accepted Rs. 562 billion (realized amount) against the target of Rs.600 billion and maturity of Rs.539 billion. The cut-off annualized yields for the last T-Bill auction was noted at 6.17%, 6.18% and 6.23% for 3, 6 and 12 month tenors respectively. T-Bills auctions bid pattern was skewed towards 12 months as compared to 3 and 6 months. In PIB auction held on 27th January 2016, MoF accepted an amount of Rs.136 billion (realized amount) against the target of Rs.100 billion and total participation of Rs.361 billion at a cut-off yield of 6.50%, 7.55% and 8.85% in the 3 year, 5 year and 10 year tenors respectively, while no bids were received in 20 year tenors. The bid pattern witnessed a major shift towards 3 year tenor followed by 5 and 10 year tenors respectively.

We have adjusted the portfolio of our money market and income funds based on the capital market expectations. We are closely monitoring the developments in the capital market and will rebalance the portfolio accordingly.

Investment Objective

The objective of the Fund is to provide investors with long term capital growth from an actively managed portfolio of Shariah Compliant listed equities.

Fund Manager's Commentary

During the month under review, NAFA Islamic Stock Fund's (NISF) unit price (NAV) decreased by 2%, whereas the Benchmark decreased by 3.2%, thus an outperformance of 1.2% was recorded. Since inception on January 9, 2015 your Fund has posted 10.5% return, versus 2.7% by the Benchmark. Thus, to-date the cumulative outperformance of your Fund stands at 7.8%. This outperformance is net of management fee and all other expenses.

NISF started off the month with an allocation of around 91% in equities, which was decreased to around 90% during the month. NISF outperformed the Benchmark in January as the Fund was underweight in select Fertilizers and Oil & Gas Exploration Companies sectors stocks which underperformed the market and overweight in select Cements, Textile Composite, and Cable & Electric Goods sectors stocks which outperformed the market. During the month, the allocation was primarily increased in Cements, Engineering, Refinery, and Textile Composite sectors stocks whereas it was reduced primarily in Oil & Gas Exploration Companies, Fertilizers, and Cable & Electric Goods sectors.

Investment Objective

The objective of NAFA Islamic Principal Protection Fund-I is to earn a potentially high return through dynamic asset allocation between shariah compliant Equities and Money Market investment avenues, while providing principal protection.

Fund Manager's Commentary

Since inception, NIPPF- I has generated a cumulative return of 23% versus 13.4% return of the Benchmark. The current equity exposure stands at around 28%. During the month, maximum multiplier stood at 2.3 whereas minimum multiplier was 1.8. Key holdings of the Fund belong to Power Generation & Distribution, Cement, and Fertilizer sectors. The Fund can invest up to 50% in equities subject to cushion availability. We are confident that the Fund will generate good returns considering the improved macroeconomic and political outlook and built in dynamic equity allocation mechanism of the Fund.

The objective of the Fund is to provide investors an opportunity to earn attractive return from an actively managed portfolio of Shari'ah Compliant Equity Fund and Income Fund.

Fund Manager's Commentary

NAFA launched NAFA Islamic Active Allocation Plan-I (NIAAP-I) this January which is the first Plan under NAFA Islamic Active Allocation Fund-I. The Active Allocation Plan will be dynamically managed between dedicated equity related and income schemes managed by NAFA based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-I has an initial maturity of two years.

Since inception, NIAAP-I has generated a return of 0.9% versus 1.5% return of the Benchmark. The current exposure in equity and Income funds stands at around 92%. The Plan can invest up to 100% in equity fund. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

Investment Objective

To earn a reasonable rate of return along with a high degree of liquidity by investing in short-term Shari'ah compliant banks deposits and money market/debt securities.

Fund Manager's Commentary

This is the first Monthly Fund Manager Report of the Fund. The Fund has generated an annualized return of 4.8% against the benchmark return of 4.7% since its launch, thus registering an outperformance of 0.1% p.a. This outperformance is net of management fee and all other expenses.

The Fund aims to consistently generate to better return than the profit rates offered by Islamic Banks / Islamic windows of commercial banks, while also providing easy liquidity along with a high quality credit profile. The Fund is allowed to invest in shariah compliant Government Securities of maturity upto 3 years as well as Shariah compliant money market and debt securities of up to 2 years maturity rated AA- or better.

Around 99.6% of the portfolio is allocated in bank deposits. The higher allocation in bank deposits is due to better yields as compared to other authorized alternative investment avenues. The weighted average time-to-maturity of the Fund is 1 day.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.
