Is it time to invest in the stock market?

After delivering a staggering return of 46% in CY16, the stock market has depicted lukewarm performance amid a lot of volatility during January-July 2017 period, with the benchmark KSE index declining by around 4%. Many positive developments such as PSX upgrade into MSCI EM index effective June-17, CPEC related investment activity gathering pace, benign inflation & interest rates, and healthy economic growth were outweighed by negative developments: (i) rising domestic political uncertainty with the start of court proceeding against the Prime Minister in January 2017 in the Panama Leaks Case; (ii) renewed decline in the global oil prices that weighed in on the index heavy Oil & Gas and Banking sectors; (iii) SECP's drive to curb in-house badla financing that crimped market liquidity; and (iv) rising risks to the Balance of Payment Position (BoP) from widening trade and current account deficits. Investors preferred to sell-off some positions amid elevated domestic political fluidity during the last couple of months that culminated in the dismissal of Prime Minister Nawaz Sharif on July 28, 2017 by the Supreme Court bench over mis-declaration of assets.

Spooked by the sharp recent correction and elevated volatility, investors are pondering whether the stock market has run its course? While we acknowledge that the economic and political risks have increased, we believe that the stock market still holds the potential to deliver attractive returns. Courtesy of a substantial correction of 13% from its peak, valuations have become attractive with the Price to Earnings ratio dropping to about 9.7 times compared to the recent peak of 11 times based on forward earnings. Corporate earnings continue to show healthy double digit growth supported by key sectors such as steel, cement, and power on account of capacity expansions; and Oil & Gas Exploration sector driven by recovery in global oil prices and some expected PKR depreciation. On the economic front, we expect the annual GDP growth rate to again cross 5% in FY18 as projects under CPEC gather pace and domestic consumption remains strong. We expect inflation and interest rates to remain anchored with modest pick-up of 75-100 basis points during FY18. However, current account deficit rising to USD12.1 billion in FY17 from USD4.9 billion in FY16 is a potential risk to the macroeconomic stability, and headwind for the stock market if left unaddressed. With foreign exchange reserves still equivalent to 17 weeks of imports, we don't see imminent Balance of Payment crisis, but endorse the view point that among others measures some currency devaluation is needed to arrest non-essential imports and alleviate exporters' concern by partially restoring competitiveness.

Going forward, some Pak Rupee devaluation and diminished political noise are likely to become catalysts for domestic and foreign buying in the stock market, as the market is attractively valued vis-à-vis other emerging & regional markets (see chart above). We advise investors with a year or more investment horizon to investment via stock mutual funds with a good performance track record.

Stock Market Review

During the month, domestic political uncertainty linked to so-called Panama Leaks Case investigation to probe corruption charges against PM Nawaz Sharif and family reached fervent point, sending jitters in the market. Investors with weak holding power panicked as the deadline for the JIT to submit its report to the apex court drew closer. Investors' anxiety amplified during the court proceedings on the JIT report with the benchmark KMI-30 Index hitting a low of 73,924 levels (down 5.9% from the previous month close) on July 13, 2017, a cumulative decline of 18.5% from the all-time high levels hit on May 24, 2017. However, this indiscriminate selling restored value in the large part of the market where valuations looked stretched after the strong rally that culminated on May 24, 2017. Confidence began to return in the market gradually as investors started accumulating positions opportunistically in the beaten down first-tier stocks. Then came the historical day, July 28, 2017, when 5 member bench of Supreme Court in a unanimous decision disqualified the Prime Minister and ordered the NAB to file criminal charges against Mr. Nawaz Sharif and family in six weeks and complete the proceeding in six months. Consequently, the market plunged around 3,100 points at one point but staged a strong recovery soon to recoup all the losses as the government decided to accept the Supreme Court judgment without any street protest or agitation. Adding to the investors' optimism was the announcement of Mr. Shahbaz Sharif, who holds a successful track record of administrative abilities and project delivery as Chief Minister Punjab, for the PM slot after he is elected in National Assembly. As we see it, this landmark judgment may be a start of process of accountability of powerful elites that is prerequisite to restore the lost confidence of local and foreign investors in the country which has immensely suffered from the menace of corruption. While risks to the deteriorating Balance of Payment are gathering due to stagnant exports, rising imports, and muted remittances growth, we don't see imminent crises in the near term.

As the political uncertainty further subsides with election of PM and announcement of his cabinet and the policy maker refocus their attention on the economy and other priority areas, we may see a brief rally from the current levels. Foreign investors continued to be net sellers though the quantum has receded as the valuation of the blue-chip stocks has become quite attractive after the recent sell-off. While devaluation of overvalued rupee is mentioned as a key risk by foreign investors, we think the current valuations more or less have priced-in this risk. That said, with market currently trading at a PE multiple of 9.7 times forward earnings, expectation of 12-15% corporate earnings growth for FY18 and FY19 and controlled inflation & benign interest rates, we believe, around 5% of the devaluation will restore the luster of our market for foreign investors.

Going forward, we advise our investors to focus on long term investment objective and resist the urge to stay on the side lines amid sporadic volatility spikes. We stick to our view that barring any shocks in the domestic politics (that we don't see) the market has the potential to deliver a healthy double digit returns during FY2017-18. That said, market volatility may remain elevated due to domestic political fluidity and global policy uncertainty.

Money Market Review

State Bank of Pakistan (SBP) in its recently announced bi-monthly Monetary Policy review maintained the policy rate at 5.75%. The central banking cited the likelihood of continued growth momentum, anchored inflation, and risks to the Balance of Payment position. Widening current account deficit and scheduled foreign loan payments led to fall in foreign exchange reserves to USD 20.4 billion versus USD 21.4 billion at the end of previous month. After recording 3.93% in June 2017, inflation as measured by the CPI for July 2017 eased to 2.9% on a year-on-year basis. We expect inflation to slightly pickup from the current benign levels on the back of some PKR depreciation, rising government & private sector borrowing, and partial recovery in global oil prices. Accordingly, we expect around 75-100 basis points increase in policy rate during FY2017-18.

During the month of July, SBP held two T-Bill auctions with a combined target of Rs. 1,300 billion against a maturity of Rs. 1,298 billion. In the first T-Bill auction, an amount of Rs. 545 billion was realized against the target of Rs. 650 billion and maturity of Rs. 611 billion at a cut-off yield of 5.99%, 6.01% and 6.04% for 3, 6 and 12 months tenor, respectively. The bid pattern skewed towards 3 month tenor. In the second T-Bill auction, Ministry of Finance (MoF) realized Rs. 1,071 billion against the target of Rs. 650 billion and maturity of Rs. 687 billion. Cut-off yields for 3, 6 and 12 months tenor were maintained. The bid pattern remained tilted towards 3 month tenor. In the PIB auction, collective bids worth Rs. 76 billion were received where an amount of Rs. 54 billion was realized against the target of Rs. 100 billion and maturity of Rs. 690 billion at a cut-off yield of 6.41%, 6.90% and 7.94% for 3 years, 05 years and 10 years tenors, respectively.

We have adjusted the portfolio of our money market and income funds based on the capital market expectations and are closely monitoring the developments in the capital markets and will rebalance the portfolio accordingly.

The objective of NAFA Islamic Principal Preservation Fund is to earn a potentially high return through dynamic asset allocation between Shariah compliant equity related, and Shariah compliant income/ money market Collective Investment Schemes, while providing principal preservation.

Fund Manager's Commentary

Since inception, NIPPF has generated a return of 9.5% p.a versus benchmark return of 8.0% p.a. The current exposure in equity/asset allocation funds stands at 13.7%. During the month, multiplier stood at 0.5. In line with directive no 18 of 2016, effective from 1st January 2017, the equity exposure of the Fund is capped at 10%. Consequently, going forward, your Fund may not be able to offer attractive returns due to very low exposure in the stock market.

Fund Manager's Commentary

NAFA launched its NAFA Islamic Active Allocation Plan-I (NIAAP-I) in January, 2016 which is the first plan under NAFA Islamic Active Allocation Fund-I. The Active Allocation Plan is dynamically managed between dedicated equity related and Income schemes managed by NAFA based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-I has an initial maturity of two years.

Since inception, NIAAP-I has generated a return of 22.4% p.a versus benchmark return of 22.0% p.a. The current exposure in Equity Fund and Income Fund stands at 74.5% & 17.3%, respectively. The Plan can invest up to 95% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

Investment Objective

The objective of the Fund is to provide investors an opportunity to earn attractive return from an actively managed portfolio of Shari'ah Compliant Equity Fund and Income Fund.

Fund Manager's Commentary

NAFA launched its NAFA Islamic Active Allocation Plan-VII (NIAAP-VII) in June, 2017 which is the second plan under NAFA Islamic Active Allocation Fund-II. The Active Allocation Plan will be dynamically managed between dedicated equity related and Income schemes managed by NAFA based on the Fund Manager's outlook of the authorized asset-classes. The Plan is presently closed for new subscription. NIAAP-VII has an initial maturity of two years.

Since inception, unit price of NIAAP-VII has decreased by 0.4% versus the Benchmark decline of 0.3%. The current exposure in Equity Fund and Income Fund stands at 54.2% & 32.9%, respectively. The Plan can invest up to 95% in equity funds. We are confident that the Plan will generate good returns considering the improved macroeconomic and political outlook and dynamic equity allocation mechanism of the Fund.

Investment Objective

To earn a reasonable rate of return along with a high degree of liquidity by investing in short-term Shari'ah compliant banks deposits and money market/debt securities.

Fund Manager Commentary

During the month under review, the Fund has generated an annualized return of 3.4% against the benchmark return of 2.4%. The performance is net of management fee and all other expenses.

The Fund aims to consistently generate better return than the profit rates offered by Islamic Banks / Islamic windows of commercial banks, while also providing easy liquidity along with a high quality credit profile. The Fund is allowed to invest in shariah compliant Government Securities of maturity up to 3 years as well as shariah compliant money market and debt securities of up to 2 years maturity rated AA- or better.

Around 73% of net assets of the portfolio is allocated in bank deposits. The higher allocation in bank deposits is due to better yields as compared to other authorized alternative investment avenues. The weighted average time-to-maturity of the Fund is 90 days.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Investment Objective

The objective of the Fund is to provide investors with long term capital growth from an actively managed portfolio of Shari'ah Compliant listed equities.

Fund Manager's Commentary

NAFA launched its second open-end Islamic Equity Fund namely NAFA Islamic Active Allocation Equity Fund (NIAAEF) in January, 2016. The aim of the Fund is to provide growth to the investment of Unit holders over the long-term in approved Shariah compliant equities.

NIAAEF started off the month with an allocation of around 89% in equities, which decreased to around 86% towards the end of the month. NIAAEF underperformed the Benchmark in July as the Fund was underweight in select Oil & Gas Exploration Companies, Power Generation & Distribution Companies, Oil & Gas Marketing Companies, and Fertilizer sectors stocks that outperformed the market and overweight in select Cement, Glass & Ceramics, Technology & Communication, Miscellaneous, Engineering, and Automobile Assembler sectors stocks which underperformed the market. During the month, the allocation was increased primarily in Oil & Gas Exploration Companies, Chemical, Technology & Communication, whereas it was reduced primarily in Automobile Assembler, Cable & Electrical Goods, and Cement sectors.
