Fund Manager Commentary

The Fund generated an annualized return of 8.82% for the month of January 2013 versus the benchmark return of 8.21%, thus an out-performance of 0.61% p.a. Since its launch in October 2011, the Fund offered an annualized return of 11.31% against the benchmark return of 10.07%, hence out-performance of 1.24% p.a. During this period Income Schemes in Pakistan gave an annualized return of 9.68% on average. This outperformance is net of management fee and all other expenses.

The Fund is unique as it invests a minimum of 70% of its assets in financial sector debt securities, instruments or deposits. Minimum entity rating of issuers of debt securities (mainly banks) is AA minus. This minimizes credit risk and at the same time enhances liquidity of the Fund. Duration of the Fund cannot be more than one year. This minimizes interest rate or pricing risk. The Fund invests 25% of its assets in less than 90 days T-Bills or saving accounts with banks, which further enhances liquidity profile of the Fund.

Exposure in TFCs was around 47% at the end of the month with average time to maturity of 4.2 years and Yield to Maturity of 10.6%. Exposure in COI and TDR was around 10.5% and 2.5% respectively. The TFC portfolio of the Fund is predominantly floating rate linked to KIBOR. Therefore, in case of increase in interest rates, the coupon income of the Fund will improve.

The weighted average time-to-maturity of the Fund is 2.04 years. We will rebalance the allocation of the portfolio proactively based on the capital market outlook.
