Fund Manager Commentary

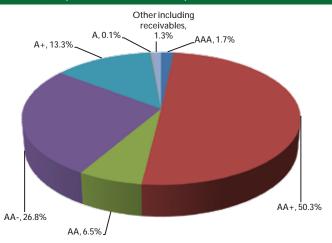

The Fund generated an annualized return of 7.5% for the month of July 2015 versus the Benchmark return of 6.4%, thus registering an outperformance of 1.1% p.a. Since its launch in October 2011, the Fund offered an annualized return of 9.9% against the Benchmark return of 9.1%, hence an outperformance of 0.8% p.a. This outperformance is net of management fee and all other expenses.

The Fund is unique as it invests a minimum 70% of its assets in Financial Sector (mainly banks) debt securities, instruments or deposits. Minimum entity rating of issuers of debt securities is AA minus. This minimizes credit risk and at the same time enhances liquidity of the Fund. Duration of the overall portfolio cannot be more than one year. This minimizes interest rate or pricing risk. The Fund invests 25% of its assets in less than 90 days T-Bills or saving accounts with banks, which further enhances liquidity profile of the Fund.

Exposure in TFCs was 31.9% at the end of the month with average time to maturity of 2.01 years. The TFC portfolio of the Fund is predominantly floating rate linked to KIBOR. The weighted average time-to-maturity of the Fund is 0.7

During the month, SBP maintained the Discount Rate in its Monetary Policy announcement on July 25, 2015, which was in line with market expectation. We will rebalance the allocation of the fund proactively based on the capital market outlook. As per the latest amendments in tax laws the Fund is not required to provide for Workers Welfare Fund (WWF) from July 01, 2015 that will improve the performance of the Fund.
