Investment Objective

To provide income enhancement and preservation of capital by investing in prime quality Financial Sector TFCs/Sukuks, Bank deposits and short-term money market instruments.

Fund Manager Commentary

The Fund generated an annualized return of 12.2% for the month of May 2015 versus the Benchmark return of 6.7%, thus registering an outperformance of 5.5% p.a. Outperformance of the Fund during the month is due to gain in TFC and PIB holdings. Since its launch in October 2011, the Fund offered an annualized return of 10.1% against the Benchmark return of 9.2%, hence an outperformance of 0.9% p.a. This outperformance is net of management fee and all other expenses.

The Fund is unique as it invests a minimum 70% of its assets in Financial Sector (mainly banks) debt securities, instruments or deposits. Minimum entity rating of issuers of debt securities is AA minus. This minimizes credit risk and at the same time enhances liquidity of the Fund. Duration of the overall portfolio cannot be more than one year. This minimizes interest rate or pricing risk. The Fund invests 25% of its assets in less than 90 days T-Bills or saving accounts with banks, which further enhances liquidity profile of the Fund.

Exposure in TFCs was 26.1% at the end of the month with average time to maturity of 2.2 years. The TFC portfolio of the Fund is predominantly floating rate linked to KIBOR. The weighted average time-to-maturity of the Fund is 0.6 years.

The highlight of the month was 100 basis points reduction in the Discount Rate (ceiling) by State Bank of Pakistan in its Monetary Policy announcement on May 23, 2015. A new "SBP target rate" is set at 50 basis points below the ceiling rate in order to ensure that the overnight rate remains close to this target rate. Width of the interest rate corridor is reduced by 50 basis points from 250 to 200 basis points. Consequently, the floor rate is set at 5.0 percent. Subsequent to reduction in policy rate yields in the market adjusted accordingly. We will rebalance the allocation of the portfolio proactively based on the capital market outlook.

Credit Quality of the Portfolio as of May 30, 2015 (% of Total Assets)

Asset Allocation (% of Total Assets) 30-May-15 30-Apr-15
