Fund Manager Commentary

The Fund posted an annualized return of 8.4% in May 2015 as compared to the Benchmark return of 7.1%, thus registering an outperformance of 1.3% p.a. During the last one year the Fund has outperformed its Benchmark by 6.6% by earning an annualized return of 15.9%. This outperformance is net of management fee and all other expenses.

Weighted average price of the TFC portfolio (excluding TFCs which are fully provided) is Rs. 98.0 against the par value of Rs. 100. The weighted average Yield to Maturity of the Fund is around 8.1% p.a. and that of the TFC portfolio is 10.4% p.a. The weighted average time to maturity of the Fund is around 0.6 years. The Fund's sector allocation is fairly diversified with exposure to Chemical, Electricity, Banking, Construction & Material and Financial Services sectors. TFC portfolio of the Fund is predominantly floating rate linked to KIBOR. However, since TFCs prices may go up or down, therefore, only investors with medium-term investment horizon are advised to invest in this Fund.

The highlight of the month was 100 basis points reduction in the Discount Rate (ceiling) by State Bank of Pakistan in its Monetary Policy announcement on May 23, 2015. A new "SBP target rate" is set at 50 basis points below the ceiling rate in order to ensure that the overnight rate remains close to this target rate. Width of the interest rate corridor is reduced by 50 basis points from 250 to 200 basis points. Consequently, the floor rate is set at 5.0 percent. Subsequent to reduction in policy rate yields in the market adjusted accordingly. We will rebalance the allocation of the portfolio proactively based on the capital market outlook.
