## **Investment Objective**

To provide investors with a combination of capital growth and income. NMF aims to achieve attractive returns at moderate levels of risk by investing in a variety of asset classes such as stocks, bonds, money market instruments, CFS etc.

### Fund Manager Commentary

During the month under review, NAFA Multi Asset Fund's (NMF) Net Asset Value (NAV) increased by 4.62% while the benchmark (50% KSE-30 index & 50% 1-month KIBOR) increased by 3.84%. Thus your Fund out-performed the benchmark by 0.78%. Since inception on January 22, 2007 your Fund has increased by 32.82%, while the benchmark has increased by 15.67%. Thus, to-date the out-performance of your Fund stands at 17.15%. This out-performance is net of management fee and all other expenses.

NMF is a Balanced Fund and market weight implies 50% weight in equities and 50% in fixed income asset class. At the start of the month NMF was around 59% invested in equities. The stock market trend during the month was mostly positive. Towards the end of the month ahead of the monetary policy announcement, we slightly reduced the allocation of NMF in equities to bring it close to the market weight. At the end of the month NMF was around 56% invested in equities. The exposure of NMF in the Oil & Gas, Chemicals, Banks and Electricity sectors contributed to the out-performance of the Fund. NMF remains significantly over-weight in selected stocks in the Oil & Gas sector and Fertilizer sub-sector, which offer attractive dividend payouts and healthy earnings growth prospects.

In the Monetary Policy Review during November, the SBP has raised the Discount Rate by another 50bps to 14%. This will improve the returns from the TFC / Sukuk portfolio following the increase in the KIBOR rates. The weighted average Yield-to-Maturity (YTM) of the TFC / Sukuk portfolio of NMF is around 23%.

NMF is invested in high dividend paying stocks with low business risk. We remain alert to the developments in the capital markets and will shift the portfolio accordingly.
