## Fund Manager Commentary

During the month of September 2010, Net Asset Value (NAV) of NAFA Islamic Multi Asset Fund (NIMF) increased by 2.50%, whereas the benchmark (50% KMI-30 index & 50% 1-month profit rate on Islamic Banks) increased by 1.83%, thus your Fund out-performed the benchmark by 0.67%.

NIMF is a Balanced Fund and market weight implies 50% weight in equities and 50% in fixed income asset class. At the start of the month, NIMF was around 42% invested in equities. The market trend was lackluster at the start of the month. Thereafter, investor outlook improved on positive developments on the leverage product front and easing of political uncertainties. We enhanced the weightage of NIMF in high dividend yielding stocks and defensive sectors. We enhanced our weightage in the Oil & Gas Exploration sub-sector that contributed to the outperformance of the Fund. Similarly, the weightage in the Fixed Line telecommunication sector was increased. We built NIMF's exposure in Gas Water and Multiutilities sector following improved earnings prospects resulting from the enhancement in allowable gas losses. The exposure of NIMF in selected high dividend yielding stocks in the Fertilizer sub-sector was unchanged. Towards the end of the month NIMF was around 49% invested in equities. On the Fixed Income side, NIMF benefited from regularization of previously non-performing Sukuk and consequent reversal in their value.

Going forward, we are expecting the Fund to perform well as we are invested in high dividend yielding stocks with stable earnings stream and attractive valuations. We are monitoring the capital market conditions and will rebalance the portfolio accordingly.
