All investments in mutual funds are subject to market risks. Past performance is not necessarily indicative of future results. Please read the Offering Document to understand investment policies and the risks involved.

Investment Objective

To minimize risk, preserve capital and generate a reasonable return along with a high degree of liquidity from a portfolio primarily constituted of bank deposits and money market instruments.

Fund Manager Commentary

The Fund earned an annualized return of 6.8% during the month versus the Benchmark return of 8% p.a. Since its launch in November 2009, the Fund has offered an annualized return of 8.4% against the Benchmark return of 6.9%, hence an outperformance of 1.5% p.a. This outperformance is net of management fee and all other expenses.

The Fund is allowed to invest in Government Securities up to a maximum maturity of 3 years and also in debt securities with rating of A and above with a maximum remaining maturity of 1 year. The Fund invests 25% of its net assets in less than 90 days T-Bills or saving accounts with banks, which further enhances liquidity profile of the Fund.

The portfolio of NSPF is invested in Treasury bills, MTS and bank deposits etc. The allocation in MTS is around 21% of net assets. The weighted average time to maturity of the entire Fund is around 17 days. Our internal guidelines permit MTS financing in only fundamentally strong companies with lower volatility. It is pertinent to mention that in this asset class the Fund provides financing at only pre-determined rates of return with no direct exposure to the stock market.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.

Credit Quality of the Portfolio as of Aug 31, 2018 (% of Total Assets)
