Investment Objective

To minimize risk, preserve capital and generate a reasonable return along with a high degree of liquidity from a portfolio primarily constituted of bank deposits and money market instruments.

Fund Manager Commentary

The Fund earned an annualized return of 6.8% during the month versus the Benchmark return of 5.8%. Since its launch in November 2009, the Fund offered an annualized return of 9.5% against the Benchmark return of 7.6%, hence an outperformance of 1.9% p.a. This outperformance is net of management fee and all other expenses.

NSPF is one of the highest rated income funds in the market due to its restrictive investment guidelines. The Fund is allowed to invest in Government Securities up to a maximum maturity of 3 years and also in debt securities with rating of A and above with a maximum remaining maturity of 1 year. The Fund invests 25% of its assets in less than 90 days T-Bills or saving accounts with banks, which further enhances liquidity profile of the Fund.

The portfolio of NSPF is invested in Treasury bills, MTS, and bank deposits etc. The allocation in MTS is around 32.4%. The weighted average time to maturity of the entire Fund is around 38 days. Our internal guidelines permit MTS financing in only fundamentally strong companies with lower volatility. It is pertinent to mention that in this asset class the Fund provides financing at only pre-determined rates of return with no direct exposure to the stock market.

The highlight of the month was 100 basis points reduction in the Discount Rate (ceiling) by State Bank of Pakistan in its Monetary Policy announcement on May 23, 2015. A new "SBP target rate" is set at 50 basis points below the ceiling rate in order to ensure that the overnight rate remains close to this target rate. Width of the interest rate corridor is reduced by 50 basis points from 250 to 200 basis points. Consequently, the floor rate is set at 5.0 percent. Subsequent to reduction in policy rate yields in the market adjusted accordingly. We will rebalance the allocation of the portfolio proactively based on the capital market outlook.
