Fund Manager's Commentary

During the month under review, NAFA Asset Allocation Fund's (NAAF) unit price (NAV) increased by 0.07% while the benchmark decreased by 0.91%. Thus your Fund out-performed the benchmark by 0.98%. Since inception on August 21, 2010 the Fund's unit price has increased by 80.27%, while the Benchmark has increased by 41.74%. Thus, to-date the cumulative out-performance of your Fund stands at 38.53%. This out-performance is net of management fee and all other expenses.

In June, the market generally remained choppy and KSE 100 Index lost 3.75%. NAAF started off the month with an allocation of around 62% in equities. However, considering the weak footing of the market, we exited from equities towards the end of the month. The Fund benefitted from reduction in allocation to equities and being over-weight in selected Oil & Gas sector and Construction and Materials sectors stocks, which performed better than the market. During June, the allocation was reduced to zero in all the sectors except Construction and Materials.
