## Investment Objective

To earn a competitive rate of return while preserving capital to the extent possible by investing in liquid assets.

## Fund Manager Commentary

The Fund posted an annualized return of 17.8% during January 2015 versus the Benchmark return of 9.2%. Outperformance of the Fund during the month is due to mark to market gain in PIB holdings. The annualized return during FYTD is 15.1% against the Benchmark return of 9.9%, hence an outperformance of 5.2% p.a. This outperformance is net of management fee and all other expenses.

As the allocation of the Fund shows, exposure in TFCs and Sukuks stands at 33.2%. All TFCs in the Fund are floating rate instruments linked to KIBOR.

The weighted average Yield-to-Maturity of the Fund is around 9.0% p.a. while its weighted average time to maturity is 1.7 years. This yield does not include potential recovery in fully provided TFCs (Face Value of Rs. 312 million), which is potential upside for the Fund. Thus, the Fund is expected to perform well over the medium to long term horizon. However, since TFCs prices may go up or down, therefore, only investors with medium term investment horizon are advised to invest in this Fund.

The highlight of the month was 100 basis points reduction in the Discount Rate by State Bank of Pakistan in its Monetary Policy announcement on January 24, 2015. Subsequent to reduction in policy rate yields in the market adjusted accordingly.
