Fund Manager Commentary

The Fund posted an annualized return of 5.7% during June 2018 versus the Benchmark return of 7.0%. The reported return is net of management fee and all other expenses.

As the allocation of the Fund shows, exposure in TFCs and Sukuks stands at 12.4% of net assets. All TFCs in the Fund are floating rate instruments linked to KIBOR.

The weighted average time to maturity of the Fund is 0.5 year. Potential recovery in fully provided TFCs (Face Value of around Rs. 309 million), is potential upside for the Fund. Thus, the Fund is expected to perform well over the medium to long term horizon. However, since TFCs prices may go up or down, therefore, only investors with medium term investment horizon are advised to invest in this Fund.

We will rebalance the allocation of the Fund proactively based on the capital market outlook.
